Investigation of the general fitness of the progeny of irradiated animals. III - The resistance of mice to irradiation, hypoxia, endotoxin, and physical stress
p0278 A82-35652

Protective effect of a gaseous hypoxic mixture under the combined effect on the organism of radiation and physical stress
p0278 A82-35653

Early diagnosis of overstrain of the cardiovascular system in athletes engaging in cyclic forms of sport
p0278 A82-35664

Recent developments in assessing the myocardial dystrophy encountered in athletes as a consequence of chronic physical overexertion
p0280 A82-35680

Strain on the regulation systems as a condition of successful adaptation to heat
p0282 A82-35837

Dependence of reactions of the organism to extremal factors on initial state
p0282 A82-35839

Measurement of cardiopulmonary performance during acute exposure to a 2440-m equivalent atmosphere
p0283 A82-35904

Effect of orthostatic stress on exercise performance after bedrest
p0283 A82-35907

Change in plasma cAMP and catecholamines in men subjected to the same relative amount of physical work stress
p0284 A82-35912

Exercise performance after ventilatory work
p0286 A82-36037

Muscle weakness following dynamic exercise in humans
p0290 A82-37929

The characteristics of hemodynamic shifts under physical stress at mountain elevations
p0307 A82-38166

Early reaction of the hemopoietic organs depending on the condition of the peripheral N-cholinergic systems
p0307 A82-38168

Migration kinetics of hemopoietic stem cells in mice after severe mechanical trauma
p0309 A82-38541

The role of central gray matter in the activation of antipain systems of the rat's brain under stress
p0309 A82-38547

The concentration of adenyl nucleotides and creatine phosphate in the cerebral hemispheres during different manifestations of stress
p0310 A82-38560

A method of evaluating the functional state of the central nervous system of a person performing work
p0311 A82-38579

The effect of serotonin on the development of acute hyperthermia in rats
p0311 A82-38583

Serotonin content of peripheral organs and tissues in rats under normal conditions and under stress during postnatal development
p0311 A82-38584

Physiological stresses linked to flight on airliners
p0314 A82-38842

Physiological stresses in flying a sailplane
p0315 A82-38850

The anti-stress role of the gamma-aminobutyric acid system of the brain
p0323 A82-40468

The combined effect of carbon monoxide and total-body vibration on the organism
p0324 A82-40475

Changes of intracellular rest potential and the length of isolated muscle under different loads
p0324 A82-40480

The role of nutrition in the changes of energy metabolism during stress
p0324 A82-40482

Physical activity and human requirements for energy and food substances
p0324 A82-40487

X-ray study of loaded skeletal portions in the upper extremities of athletes engaging in karate
p0325 A82-40490

The early reaction of the hemopoietic organs to stress, depending on the condition of the peripheral N-cholinergic systems
p0325 A82-40499

The effect of hypoxic and hypobaric exercises on the blood-brain barrier in rats
p0332 A82-40713

Analysis of transient cardiovascular response to orthostatic stress using noninvasive methods
p0335 A82-40740

The use of biochemical monitoring methods in the ergometry of patients with atherosclerosis
p0344 A82-41494

Functional condition of the heart mitochondria in the dynamics of emotional and pain stress
p0344 A82-41500

The condition of the cardiovascular system in air traffic controllers according to data acquired at the workplace
p0368 A82-42614

A physiological justification of allowable noise levels in work involving heavy physical labor under nervous stress
p0368 A82-42617

Changes in the lymphoid organs of rats under the effect of acute hypoxia
p0368 A82-42623

Analysis of methods for evaluating thermal stress --- effects on human beings
p0370 A82-42994

Individual features of the vegetative regulation of body functions during the adaptation of sailors in the tropics
p0370 A82-42996

Evaluation of the heaviness of physical work with marked nervous-emotional stress
p0372 A82-43240

Internal stresses and contractility of myocardium
p0372 A82-43513

The effect of a physiological load on the exchange and phosphorylation of cell membrane proteins in the brain of rats
p0374 A82-43654

Effect of heat stress on cutaneous vascular responses to the initiation of exercise
p0376 A82-44146

Head cooling and heat
p0376 A82-44292

Possible adaptation to strong magnetic fields --- by animals
[IAF PAPER 82-188] p0377 A82-44690

The increase in the endurance for static loads in irradiated rats treated with gas hypoxic mixture /GHM-10/, an anti-irradiation agent
p0404 A82-45786

Prevention of stress damage to the heart and its hypoxic contracture with the natural antioxidant alpha-tocopherol
p0410 A82-46716

The activities of the dehydrogenases of the Krebs cycle and the enzymes of tissue respiration during myocardial necrosis in stress-impaired rats
p0413 A82-46881

Pulmonary function in normal humans with exercise and temperature-humidity stress
p0419 A82-47391

Determination of efficient methods of lift by comparing trained and untrained male and female lifters
[AD-A100349] p0038 N82-13650

Fatigue in Flight Inspection Field Office (FIFO) flight crews
[AD-A106791] p0127 N82-16733

Stress and biological rhythms
p0213 N82-20837

F/FB-111 ejection experience (1967-1980). Part 1: Evaluation and recommendations

[AD-A110199] p0222 N82-21879
Recording basic climatic parameters and their processing into integrated heat stress indices
[DRIC-T-6292] p0223 N82-21885
Epidemiology feasibility study: Effects of noise on the cardiovascular system
[PB82-147752] p0301 N82-27974
Epidemiology feasibility study: Effects of noise on the cardiovascular system: Appendix B: Annotated bibliography. Literature. The effects of noise on the cardiovascular system
[PB82-147760] p0301 N82-27975
Epidemiology feasibility study: Effects of noise on the cardiovascular system. Appendix C: Review of non-noise related research of cardiovascular disease
[PB82-147778] p0301 N82-27976
Role of hormonal compounds in regulation of electrolyte metabolism in the presence of emotional stress
p0348 N82-28952
Slow waves of cardiac rhythm in healthy man under different conditions
p0348 N82-28955
Physiological studies of heat stress acclimation during a specific exercise regimen
[AD-A111897] p0353 N82-28991
Task analysis and the ability requirements of tasks: Collected papers
[AD-A111181] p0354 N82-29000
Hypo-and hyperglycemia in rats: Effects on the ability to work in the heat
[AD-A111711] p0356 N82-29849
Significance of minute volume parameters to evaluation of vestibular stability
p0357 N82-29860
Phase analysis of dynamics of galvanic skin responses in man
p0357 N82-29861
Influence of stress on the blood system reaction in adrenalectomized mice
[NASA-TM-76902] p0383 N82-30877
Effect of mebicar on animals under extreme conditions
[NASA-TM-76851] p0383 N82-30879
Reaction of the blood system to single and double effect of a stress agent
[NASA-TM-76866] p0383 N82-30880
Activation of the cerebral gba-ergic inhibiting system in stress
[NASA-TM-76867] p0384 N82-30881
Catecholamines in the blood plasma of August and Wistar rats during emotional stress
[NASA-TM-76872] p0384 N82-30885
Changes of blood plasma renin activity in August and Wistar rats under emotional stress
[NASA-TM-76873] p0384 N82-30886
Glucocorticoid receptors and metabolic disturbances in the (rat) liver and heart during immobilization
[NASA-TM-76874] p0384 N82-30887
Genetic and individual differences in cardiovascular disturbances of rats during experimental emotional stress
[NASA-TM-76911] p0385 N82-30890
Effect of immobilization stress on diacyl- and plasmalogen-derivatives of phospholipids in various rat organs and tissues
[NASA-TM-76852] p0385 N82-30891
Effect of sensitization on development of stress gastric ulcers in rats
[NASA-TM-76868] p0385 N82-30892
Specific cytoplasmic glucocorticoid receptors of rat liver under conditions of immobilization stress
[NASA-TM-76863] p0385 N82-30893
Specific cytoplasmic glucocorticoid receptors of the rat liver during immobilization stress
[NASA-TM-76869] p0385 N82-30894
Efficacy of cimetidin in the prevention of ulcer formation in the stomach during immobilization stress
[NASA-TM-76864] p0389 N82-30923
The role of the hypophysis in early reaction of hemopoietic organs to stress
[NASA-TM-76865] p0390 N82-30924
Detailed research plan: Cardiovascular effects of noise
[PB82-163379] p0391 N82-30934
Stress, anxiety, and cognitive interference: Reactions to tests
[AD-A113564] p0435 N82-34031

STRESS (PSYCHOLOGY)
Instructor pilot teaching behavior and student pilot stress in flight training
p0005 A82-11028
Damage and repair of heart muscle DNA during emotional-pain stress
p0055 A82-16822
Informational need of emotional stress --- effect on operator performance of visual tasks
p0058 A82-16943
Recent life change measurement in Canadian Forces pilots
p0072 A82-18733
Staying sane in space
p0089 A82-19743
Acute experimental emotional stress in rabbits in a modulated electromagnetic field
p0092 A82-20307
The influence of adaptation on the periodic effect of hypoxia on the poststress activation of the primary immune response
p0093 A82-20320
Contractile dysfunction of vascular wall smooth muscle under emotional nociceptive stress
p0094 A82-20322
Functional condition of the rat sympato-adrenal system during emotional and nociceptive stress
p0095 A82-20335
Change in the nature of the psychotropic effect on the emotional reactivity and behavior in stress situations depending on the state of the catecholaminergic systems of the brain
p0112 A82-21739
Activation of the metabolism of the gamma-aminobutyric acid system in the cerebral hemispheres under various types of stress
p0113 A82-21746
Adaptogenic effect of mebicar during emotional stress, exercise, and hypoxia
p0115 A82-21780
EEG evaluation of mental stress
p0116 A82-21784
Emotions, sleep, and health
p0117 A82-21804
The dynamics and physiological importance of the activation of the gamma-amino-butyric acid system in the brain and cardiac muscle under pain and emotional stress
p0117 A82-21808
Acute experimental emotional stress in rabbits /physiological and cytochemical aspects/
p0119 A82-21825
The effects of noise - A review --- on human performance of complex tasks
p0141 A82-22921
Morphological changes in the hematopoietic organs of rats under the influence of adrenalin
p0150 A82-23167
Genetic and individual differences in cardiovascular disturbances in rats during experimental emotional stress
p0153 A82-23278
An evaluation of the total stress involved in certain types of precision work
p0161 A82-24514
Establishing methods of investigating individual characteristics of making decisions in situations of conflict
p0162 A82-24528
Psychophysiological characteristics of the fatigue state based on activation indicators
p0162 A82-24529
Correlation of the stress protective and autonomotropic effects of mebicar
p0164 A82-24559
Systemic mechanisms of emotional stress --- Russian book
p0170 A82-25231
Effects of emotional stress in bus drivers
p0191 A82-25819
An introduction to disaster - Some considerations of a psychological nature
p0193 A82-26236
Serial personality evaluations of repatriated U.S. Air Force southeast Asia POWs
p0193 A82-26237

The content of RNA in structures of the autonomic nervous system of rabbits under acute emotional stress
p0202 A82-27759
Effects of microwaves on acupuncture points under conditions of acute emotional stress in rabbits
p0202 A82-27763
Changes in the level of catecholamines in the noradrenaline-synthesizing structures of the rat brain following immobilization
p0202 A82-27764
Microionophoretic analysis of the chemical sensitivity of neurons of the medial thalamus and ventromedial hypothalamus to acetylcholine in the case of immobilization-produced emotional stress in rats
p0203 A82-27770
Incidence of ischemic heart disease and arterial hypertension in sedentary workers
p0205 A82-27793
Self-stimulation response as an anti-stress factor in animals
p0205 A82-27799
Relation of changes in autonomic reactions to the effectiveness of mental activity under conditions of emotional stress
p0236 A82-31158
Preventing disturbances to the structure of DNA in the cardiac muscle from emotional-nociceptive stress by blocking beta-adrenoreceptors and the peroxidation of lipids
p0241 A82-31528
Lipid peroxidation and retinal damage under stress
p0262 A82-34682
The role of stress in the pathogenesis of ischemic heart disease
p0279 A82-35677
The effect of threat on psychomotor and intellectual performance depending on characteristics of temperament
p0287 A82-36691
The effect of repeated episodes of emotional stress on heart activity and the content of monoamines in the heart
p0307 A82-38163
The influence of the GABA-receptor blocker bicuculline on the effects of fenibut and diazepam
p0308 A82-38539
Ultrastructural changes in the brains of rats subjected to acute emotional stress
p0310 A82-38558
Adapting a scale for measuring competition anxiety
p0322 A82-40450
A factor of resistance to emotional stress in the brain of rats
p0322 A82-40452
The correlations of the central nervous system and thyroid functions in conditions of chronic emotional stress
p0322 A82-40453
Statistical analysis of neuronal impulse activity in the diencephalon during immobilization-produced emotional stress in rats
p0323 A82-40467
The anti-stress role of the gamma-aminobutyric acid system of the brain
p0323 A82-40468
Psychic stress in athletic activity
p0325 A82-40489
Activation of lipid peroxidation during stress in man, evaluated according to the content of pentane in expired air
p0367 A82-42600
Emotional stress and hypokinesia in the origination of cardiac disorders and hypertensive states
p0367 A82-42608
A systems analysis of individual vascular reactions in animals under experimentally induced emotional stress
p0367 A82-42610
A physiological justification of allowable noise levels in work involving heavy physical labor under nervous stress
p0368 A82-42617
Electrocardiographic correlates of emotional stress
p0371 A82-43236
Evaluation of the heaviness of physical work with marked nervous-emotional stress
p0372 A82-43240
The mechanisms of hypertensive responses during emotional stress
p0373 A82-43630
A composite assessment of heart rhythm regulation during dosed functional loads
p0373 A82-43637
Individual differences in multi-task response strategies
p0407 A82-46273
EEG changes in sleep upon emotional stress
p0421 A82-48225
Catecholamine levels in fit and nonfit males when exposed to an emotional stress
p0170 N82-19813
Stress, information processing and diving
[IZF-1981-4] p0268 N82-24829
Effect of operator mental loading on voice recognition system performance
[AD-A107477] p0301 N82-27980
Task analysis and the ability requirements of tasks: Collected papers
[AD-A111181] p0354 N82-29000
Biogenic monoamine content of the ganglia in the autonomic nervous system of rabbits during acute experimental emotional stress
[NASA-TM-76900] p0383 N82-30875
Activation of the cerebral gba-ergic inhibiting system in stress
[NASA-TM-76867] p0384 N82-30881
Emotional stress as a factor in cardiovascular disturbances
[NASA-TM-76910] p0385 N82-30889
Genetic and individual differences in cardiovascular disturbances of rats during experimental emotional stress
[NASA-TM-76911] p0385 N82-30890

STRESS ANALYSIS
Does heat acclimation lower the rate of metabolism elicited by muscular exercise
[AD-A110555] p0296 N82-26977

STRESS CALCULATIONS
U STRESS ANALYSIS

STRESS CONCENTRATION
Three-dimensional stress distribution in arteries: Radial compression experiments of arterial wall; stress concentration in lung near a cylindrical cavity; finite element analysis of pleural surface pressure distribution in dog's lung during electrophrenic stimulation

THERMOREGULATION
Metabolism and thermoregulation during stages of sleep in humans exposed to heat and cold p0006 A82-11157
Thermoregulatory responses to local convective and radiative cooling p0017 A82-12951
Changes in the heat resistance of rats under various regimes of cold adaptation p0018 A82-12952
Arm and leg intravascular temperatures of men during submaximal exercise p0018 A82-13227
The age characteristics of physical thermoregulation p0053 A82-16808
Some characteristics of thermal adaptation in small laboratory animals p0060 A82-16971
Enhanced heat production in physically restrained rats in hypoxia p0089 A82-19496
The influence of muscular work on the vestigial effects of cold acclimation p0090 A82-19749
Body temperature changes during the practice of g Tum-mo yoga p0106 A82-21213
The effect of synaptically active drugs on the hyperthermic effect of prostaglandin E2 in rats p0112 A82-21741
Application of a predictive core temperature model to heat stress experimentation p0143 A82-22941
The effects of serotonin on shivering thermogenesis p0157 A82-23646
The regulation of body temperature during physical work p0166 A82-24836
Strain difference in thermoregulation of rats surviving extreme heat p0169 A82-24920
Thermoregulation and morbidity in coal miners p0191 A82-25815
The physiology and hygiene of the individual protection of man from the cold --- Russian book p0194 A82-26522
Thermoregulatory responses in the rat to exercise in the heat following prolonged heat exposure p0197 A82-26818
The possibility of maintaining the temperature and work capacity of the extremities p0206 A82-27806
Trace reactions and the ambient temperature --- organism, organ and tissue thermoregulatory reactions p0209 A82-28454
Adaptive changes in cats after long-term exposure to various temperatures p0230 A82-29563
Adjustments in metabolic heat production by squirrel monkeys exposed to microwaves p0230 A82-29569
Under the hot sun --- human heat acclimatization in deserts p0234 A82-30303
Thermoregulatory influences on common carotid blood flow in the dog p0255 A82-32829
Central and peripheral inputs in sweating regulation during thermal transients p0255 A82-32830
Human adaptation in arid regions p0281 A82-35820
Strain on the regulation systems as a condition of successful adaptation to heat p0282 A82-35837
Splanchnic vasoconstriction in heat-stressed men - Role of renin-angiotensin system p0285 A82-36028
Superficial shell insulation in resting and exercising men in cold water p0285 A82-36034
The thermal pulsation method in the study of several physiological mechanisms of the brain stem p0310 A82-38559
The effect of serotonin on the development of acute hyperthermia in rats p0311 A82-38583
Trace reactions of the frog tissue metabolism on changes of ambient temperature in the frog Rana ridibunda Pall p0320 A82-40316
Thermoregulation and the menstrual cycle p0321 A82-40441
Centrifuge high-g effects on temperature regulation in unanesthetized rats p0328 A82-40671
Alterations in heat loss and heat production mechanisms in rat exposed to hypergravic fields p0333 A82-40718
Temperature and behavioral responses of squirrel monkeys to 2Gz acceleration p0338 A82-40774
Effect of heating rate on evaporative heat loss in the microwave-exposed mouse p0340 A82-41208
In vivo and in vitro characteristics of eccrine sweating in patas and rhesus monkeys p0340 A82-41214
Methods of human adaptation to heat p0370 A82-42993
Thermogenesis and muscle activity during the adaptation to cold --- Russian book p0372 A82-43610
Hormone response of normal and intermittent cold-preadapted humans to continuous cold p0375 A82-44137
The effect of head cooling on deep body temperature and thermal comfort in man p0417 A82-47341
Cutaneous vascular response to exercise and acute hypoxia p0418 A82-47385
Ways and means of maintaining heat balance in pilots and cosmonauts p0123 N82-16706

U THORIUM ISOTOPES
**THREE DIMENSIONAL MOTION**
Automatic planning of manipulator transfer movements
p0025 A82-15391
Robot with sense of touch
p0061 A82-17133
Determining the instantaneous direction of motion from optical flow generated by a curvilinearly moving observer
[AD-A109566] p0218 N82-20874
The inverse dynamics of three-dimensional hominoid motion
[CSIR-SWISK-24] p0247 N82-22887
**THRESHOLDS (PERCEPTION)**
Dynamic approach to the analysis of the signal detection process --- in psychophysics
p0160 A82-24905
Multiplication noise in the human visual system at threshold. I - Quantum fluctuations and minimum detectable energy
p0207 A82-28114
Comparison of flicker-photometric and flicker-threshold spectral sensitivities while the eye is adapted to colored backgrounds
p0208 A82-28123
Perception of suprathreshold stimuli during saccadic eye movement
p0235 A82-30870
Evidence for transient luminance and quasi-sustained color mechanisms --- in human vision
p0235 A82-30871
Contour curvature analysis - Hyperacuities in the discrimination of detailed shape --- human performance efficiency
p0235 A82-30872
Visual depth sensitivities of various cues for depth perception
p0238 A82-31487
Electrometric studies of the human gustatory analyzer in healthy persons and in the simulation of weightlessness
p0242 A82-31538
Auditory perception of radio-frequency electromagnetic fields
p0281 A82-35811
Effects of reference lines on displacement thresholds at various durations of movement --- in human visual perception
p0314 A82-38797
Application of xylite for the detection of labyrinthine hydrops
p0316 A82-39243
Temporal sensitivities to square-wave gratings, sawtooth-wave gratings and their fundamentals - More evidence for multiple spatial frequency channels in human vision
p0318 A82-39437
Discrimination and detection thresholds - The effect of observer criterion on the spatial properties of chromatic and achromatic mechanisms
p0318 A82-39438
An absolute threshold in psychoacoustics
p0322 A82-40448
Contrast increment thresholds of rhesus monkeys
p0370 A82-43099
Threshold models of spatial vision
p0371 A82-43230
Effect of motion sweep duration and number of stations upon interpolation in discontinuous motion --- visual tracking motion perception
p0403 A82-45674
Spectral sensitivity of the peripheral retina to large and small stimuli
p0403 A82-45675
Thresholds of hearing by air conduction and by bone conduction under different masking conditions
[NPL-AC-100] p0034 N82-12768
How to display digital SONAR signals. Some primary threshold measurements
[IZF-1979-16] p0035 N82-12773
The efficiency of detecting tribar patterns modulated in random dot density
[IZF-1980-25] p0036 N82-12779
Temporal integration of acoustic power for interrupted stimuli at suprathreshold levels
p0135 N82-17856
Effect of caloric stimulation of vestibular system on hearing
p0349 N82-28963
Determining visual acuity thresholds: A simulation study of stimulus presentation strategies
[AD-A111821] p0353 N82-28992
**THROMBIN**
Participation of the hypophyseal-adrenal cortex system in thrombin clearance during immobilization stress
[NASA-TM-76729] p0012 N82-11760
**THROMBOCYTES**
Lipid levels in the bone marrow megakaryocytes and thrombocytes of healthy people
p0164 A82-24555
Electron-histochemical and functional evaluation of the effects of aspirin on the thrombocytes of healthy people and patients with ischemic heart disease
p0204 A82-27784
**THROMBOSIS**
Limitations of echocardiographic techniques in evaluation of left atrial masses
p0169 A82-25135
Two dimensional echocardiographic detection of intraatrial masses
p0169 A82-25136
**THYMIDINE**
Polyploidization delay in rat hepatocytes under liver growth inhibition by hypokinesia
[NASA-TM-76515] p0075 N82-14794
**THYMUS GLAND**
Clinical results on thymectomy in patients with myopathy in relation to the degree of muscular weakness
p0113 A82-21755
Effect of thymalin on the system of cyclic nucleotides in the mouse spleen
p0262 A82-34679
Regulation of the functional activity of stem cells which are the precursors of granulomonopoiesis by polypeptide thymic and bone marrow factors
p0262 A82-34684
Structural changes of the thymus of irradiated animals that were also subjected to heat trauma
p0278 A82-35651
Changes in the relations of pyrimidine blocks in DNA of the hematopoietic system immediately following gamma irradiation of the animal
p0306 A82-38152
Experimental and clinical study of a new immunoregulatory preparation - thymalin
p0307 A82-38177
Morphological criteria for diagnosing pathologies of the thymus with myasthenia
p0369 A82-42633
The activity of ribosephosphate pyrophosphokinase in the thymus and liver of irradiated mice
p0404 A82-45779
The molecular mechanisms of the interphase death of lymphoid cells. V - Determination of the lifespan of nuclear and polysomal RNA in

irradiated thymocytes
p0412 A82-46867
Cell dynamics in the lymphoid organs during long-term administration of tritium oxide in varying doses
p0412 A82-46869
State of the endocrine glands in hypodynamia (A review of the literature)
[NASA-TM-76906] p0390 N82-30926

THYROID GLAND
Thyroid and hypophysial thyrotropic function in athletes during bicycle ergometer exercise
p0189 A82-25716
Reflexometry as an additional method of investigating hypoactivity in the thyroid gland
p0190 A82-25802
Adaptation of skeletal and cardiac muscle to elevated motor activity in hypo- and athyreotic rats
p0241 A82-31527
The correlations of the central nervous system and thyroid functions in conditions of chronic emotional stress
p0322 A82-40453
The hypophysial-thyroid system in the course of a complicated and an uncomplicated myocardial infarction
p0410 A82-46716
Role of the thyroid gland during adaptation of skeletal muscles to increased motor activity
[NASA-TM-76871] p0384 N82-30888
State of the endocrine glands in hypodynamia (A review of the literature)
[NASA-TM-76906] p0390 N82-30926
A technique for long-term measurements of thyroid function in beagle dogs using iodine 125
[PDA-A-59003-H3] p0393 N82-31890
Morphological distinctions of Macaca rhesus monkey thyroid under normal and various types of hypokinetic conditions
p0395 N82-31908

THYROXINE
Altitude-induced changes in plasma thyroxine, 3,5,3 prime-triiodothyronine, and thyrotropin in rats
p0340 A82-41207
The effect of leuenkephalin and thyroxine on the lymphatic and blood microvessels
p0344 A82-41490

TIBIA
Radiographic evidence of disuse osteoporosis in the monkey /M. nemestrina/
p0198 A82-26928
Aortic and tibial bloodflow response to lower body negative pressure /LBNP/
p0338 A82-40727

TIME DEPENDENCE
Comparison of impedance ventricular function indices with systolic time intervals
p0023 A82-14806
An investigation of the visual observations made by cosmonauts under experimental and actual conditions
p0156 A82-23305
Sex differences in cardiac responses to successive apnea periods
p0252 A82-32011
Strain on the regulation systems as a condition of successful adaptation to heat
p0282 A82-35837
Bohr effect and slope of the oxygen dissociation curve after physical training
p0285 A82-36032
Attenuation of blood pressure increases in Dahl salt-sensitive rats by exercise
p0286 A82-36039
Effect of habitual exercise on left ventricular response to exercise
p0286 A82-36040
Temporal sensitivities to square-wave gratings, sawtooth-wave gratings and their fundamentals - More evidence for multiple spatial frequency channels in human vision
p0318 A82-39437
Antimotion-sickness efficacy of scopolamine 12 and 72 hours after transdermal administration
p0320 A82-40437
Dynamics of the process of the determination of orientation by man
p0371 A82-43231

TIME DISCRIMINATION
Effect of counting and tracking on verbal and production methods of time estimation
p0380 N82-30845
Effect of counting and tracking on verbal and production methods of time estimation
p0438 N82-34049

TIME FUNCTIONS
Effects of whole and partial body exposure to dry heat on certain performance measures
[AD-A100305] p0246 N82-22880

TIME LAG
Effect of calcium on the temporal characteristics of muscle contraction
p0109 A82-21708
Modifications in systolic time intervals induced by the transition to weightlessness
p0171 A82-25495
The stability of a model with time lag, with the phytoplankton-phosphorous system considered as an example
p0420 A82-48209
A comparison of control modes for time-delayed remote manipulation
p0382 N82-30868
A comparison of control modes for time-delayed remote manipulation
p0442 N82-34072

TIME MEASUREMENT
Measurement of systolic time intervals by electrical plethysmography Validation with invasive and noninvasive methods
p0073 A82-18742
Onset and offset of brain events as indices of mental chronometry
p0165 A82-24800
Pulsars' timing noise and external disturbances - Gravitational waves
A82-27519
Effect of counting and tracking on verbal and production methods of time estimation
p0380 N82-30845

TIME OPTIMAL CONTROL
Modeling human tracking error in several different anti-tank systems
p0044 N82-13699

TIME RESPONSE
The importance of pauses during work with vibrating tools
p0187 A82-25698
Features of the temporal organization of the activated phase of sleep in frogs and turtles
p0240 A82-31522
The effects of hypoxia on serial response time
p0254 A82-32390
Pilot model hypothesis testing
p0438 N82-34047
Effects of higher order control systems on aircraft approach and landing longitudinal handling qualities
p0438 N82-34052

TIME SERIES ANALYSIS
Computational problems in autoregressive moving average (ARMA) models
p0044 N82-13698
Determining the instantaneous direction of motion from optical flow generated by a curvilinearly moving observer
[AD-A109566] p0218 N82-20874
Modeling of human operator dynamics in simple manual control utilizing time series analysis --- tracking (position)
p0436 N82-34038

TIME SHARING
On the training of the sharing skills - An

attention viewpoint
p0141 A82-22925

The effect of stimulus-central processing-response compatibility and resource competition on pilot performance
[AD-A113754] p0435 N82-34032

Factors determining temporal pattern of isobaric supersaturation --- in tissue blood gas transport models of bubble production
p0006 A82-11153

Increased hemoglobin-oxygen affinity does not decrease skeletal muscle oxygen consumption
p0006 A82-11154

Interaction of electromagnetic fields with biological bodies
p0006 A82-11539

Oxygen deficiency in tissues and their blood supply
p0020 A82-13700

The measurement of oxygen and carbon dioxide partial pressures in tissues by the gas depot method
p0093 A82-20318

A combined method for the study of tissue respiration under conditions corresponding to natural gas homeostasis
p0093 A82-20321

Measurement of radio frequency permittivity of biological tissues with an open-ended coaxial line. I
p0097 A82-20891

Measurement of radio frequency permittivity of biological tissues with an open-ended coaxial line. II - Experimental results
p0097 A82-20892

A mathematical model of cell populations with stem cells
p0109 A82-21702

Evaluation of safety of decompression from the critical volume of gas bubbles formed in the organism
p0110 A82-21717

Age morphofunctional characteristics of chromaffin tissue in the celiac nodes, both in the norm and with hypokinesia
p0114 A82-21766

The source of reparative regeneration in skeletal muscle tissue
p0114 A82-21768

The role of CO2 in the mechanism of the reparative regeneration of bone tissue /a radioisotopic study/
p0117 A82-21800

Tissue hypoxia and its correction --- Russian book
p0168 A82-24910

Hematopoietic tissue development in Japanese quail embryogenesis
p0201 A82-27748

Regeneration of skeletal muscle after mechanical trauma in reptiles
p0203 A82-27767

Tissue chemoreceptors
p0209 A82-28453

The biological and therapeutic effect of microwaves
p0239 A82-31506

Velocity and attenuation of sound in arterial tissues
p0254 A82-32423

The effect of helium on gas exchange and tissue respiration
p0307 A82-38165

Histoenzymological changes in experimental animals exposed to variable noise
p0311 A82-38577

Serotonin content of peripheral organs and tissues in rats under normal conditions and under stress during postnatal development
p0311 A82-38584

The content of cAMP and cGMP in brain tissues during adaptation to ischemia
p0320 A82-40310

Trace reactions of the frog tissue metabolism on changes of ambient temperature in the frog Rana ridibunda Pall
p0320 A82-40316

Space flight effects upon plasma and tissue lipids in rats
p0333 A82-40722

The assimilation of vitamin C in seamen during voyages at high latitudes
p0342 A82-41465

Myosatellocytes and cambial properties of skeletal and muscular tissue
p0342 A82-41469

Principles of the definition and classification of tissues
p0368 A82-42620

The topography of elements of the cardiac conduction system
p0369 A82-42625

An investigation of the postirradiation dynamics of lymphopoiesis using a mathematical model
p0404 A82-45778

The radiation sensitivity of animals exposed to a modified gas environment. IV - A comparative study of the effect of the respiration of pure oxygen at normal pressures on the proliferating activity of hemopoietic tissues and epithelial cells of the small intestine
p0404 A82-45783

The age-related changes of biochemical and biomechanical parameters of human sclera in normal and myopic individuals
p0410 A82-46713

The activities of the dehydrogenases of the Krebs cycle and the enzymes of tissue respiration during myocardial necrosis in stress-impaired rats
p0413 A82-46081

A model of monomeric tissue growth
p0419 A82-48203

Historico-epistemological analysis of the concept of 'tissue'
p0420 A82-48218

The structural-functional characteristics of the bush-like interoceptors in the initial period of anoxia
p0421 A82-48223

Cadmium analysis in vivo --- neutron activation analysis, tissues
[FOA-C-40126-W4(C3)] p0010 N82-10715

Altered tissue reactivity and interactions between chemicals
[DE81-023189] p0014 N82-11777

Quantitation of tissue loss during prolonged space flight
[NASA-CR-167460] p0033 N82-12752

Human factors for the future: Trends and speculations
p0182 N82-19845
TRICHLORIDES
U CHLORIDES
TRIGGERS
U ACTUATORS
TRINITROTOLUENE
Investigation of behaviorally modified rats for use in explosives detection systems
[AD-A114632] p0386 N82-30895
TRIPLET EXCITATION
U ATOMIC ENERGY LEVELS
TRIPLET STATE
U ATOMIC ENERGY LEVELS
TRITIUM
Tritium oxide distribution and excretion kinetics in the exposure of animals to noise
p0342 A82-41463
Chromosome aberrations in myelocaryocytes caused by the chronic action of tritium oxide at various dose rates
p0411 A82-46856

Cell dynamics in the lymphoid organs during long-term administration of tritium oxide in varying doses
p0412 A82-46869

TROPICAL REGIONS
Laws governing readaptation for seamen after a low-latitude cruise
p0092 A82-20310
Physiological-hygienic substantiation of admissible noise level in school rooms in a hot climate
p0113 A82-21749
Characteristics of skin function in sailors in the tropics
p0170 A82-25189
Some indicators of human adaptation to humid tropical conditions
p0230 A82-31095
Some characteristics of the diurnal rhythm of physiological functions of sailors in the tropics
p0308 A82-38180
Individual features of the vegetative regulation of body functions during the adaptation of sailors in the tropics
p0370 A82-42996

TROPICS
U TROPICAL REGIONS

TROPISM
NT GEOTROPISM

TROPOPAUSE
Cabin ozone and tropopause definition
p0220 N82-21151

TROUBLESHOOTING
U MAINTENANCE

TRUNKS (LINES)
U TRANSMISSION LINES

TRYPSIN
Principles of enzyme stabilization - Polyacrylamide-gel-immobilized trypsin and chymotrypsin with high catalytic activity at elevated temperatures
p0228 A82-29446

TRYPTAMINES
NT SEROTONIN

TRYPTOPHAN
Nutrients that modify brain function
p0189 A82-25722

TSUNAMI WAVES
Impact of an asteroid or comet in the ocean and extinction of terrestrial life
[NASA-CR-169086] p0293 N82-26955

TUBERCULOSIS
Cardiac function in surgical tuberculosis patients under conditions of prolonged bed rest
p0161 A82-24519

TUMORS
NT CANCER
NT NEOPLASMS
Stereotactic biopsy of brain tumors based on computerized tomography
p0165 A82-24561
Laryngocele and barotraumatism
p0408 A82-46310
The nonadditive effects of neutron and gamma radiation on Ehrlich ascites tumor cells
p0411 A82-46857
The induction of tumors in the brain of rabbits by chronic local irradiation from implanted radioactive sources
p0411 A82-46859
Biophysical fundamentals and instrumentation for the endovesical Nd:YAG-laser application --- tumor therapy
[NBB-UA-581-31-0] p0133 N82-17843
Some physiological and biochemical features of cells of carrot gall developed in weightlessness
p0270 N82-25764
Distribution of heat in biological tissues under influence of UHF electromagnetic fields --- for tumor treatment
p0388 N82-30909
Some computer applications and digital image processing in nuclear medicine
p0431 N82-34000

TUNING
Peculiarities of the middle ear structure in rodents as an index of the frequency tuning of their auditory system
p0110 A82-21718
Quantification of psychoacoustic tuning curve sharpness: An analysis of frequency resolution in children and adults
p0135 N82-17857

TUNNEL RESISTORS
U ELECTRON TUNNELING

TUNNELING (EXCAVATION)
Vestibular dysfunctions in caisson workers subjected to a combination of occupational hazards
p0187 A82-25689

TURBOFAN AIRCRAFT
NT CONCORDE AIRCRAFT
NT F-111 AIRCRAFT

TURBOJET AIRCRAFT
U JET AIRCRAFT

TURBOPROP AIRCRAFT
Effect of synthesized propeller vibration on passenger annoyance in a turboprop interior noise environment
[NASA-TM-84515] p0400 N82-31944

TURNING FLIGHT
Orientation perception during aircraft coordinated turns
[AIAA PAPER 82-0258] p0198 A82-27096

U

U.S.S.R.
A contribution to the history of Russian and Soviet aviation psychology: Documents and materials --- Russian book
p0235 A82-30875
Ways to improve therapeutic and prophylactic assistance to water-transport workers
p0240 A82-31516
Basic principles for hygienic rating of industrial whole-body vibration in the U.S.S.R.
p0260 A82-33757
USSR report: Life sciences biomedical and behavioral sciences, no. 13
[JPRS-79639] p0082 N82-15763
Status of space biomedical programs
p0129 N82-17239
Plasma and tissue lipids of rats following flight aboard Cosmos-936 biosatellite
p0271 N82-25767
Plasma and tissue lipids of rats following flight aboard the Cosmos-1129 biosatellite
p0271 N82-25768
Mineral phase and protein matrix of rat osseous tissue following flight aboard the Cosmos-1129 biosatellite
p0271 N82-25769
Neurophysiological characteristics of sensorimotor cortex of rats submitted to early motor deprivation and conditioning
p0271 N82-25770
Man's adaptive reactions to acoustic parameters of isolated habitats
p0271 N82-25773
Age-related distinctions of echocardiographic parameters of healthy man
p0272 N82-25774
Role of polarization and resonance in assessing the biological effects of electromagnetic radiation
p0272 N82-25775
Sympathoadrenal system of cosmonauts following 7-day flights
p0272 N82-25776
Venous pressure as an indicator of circulating blood volume
p0272 N82-25777
Electrometric characteristics of man's gastrolingual reflex
p0272 N82-25778
USSR report. Life sciences. Biomedical and behavioral sciences, no. 18
[JPRS-81428] p0357 N82-29857

U.S.S.R. SPACE PROGRAM
Summary of medical investigations in the U.S.S.R. manned space missions
p0056 A82-16928
Scientific-technical and organizational problems of cosmonaut training
p0198 A82-27503
Space biology and medicine

**ULCERS**
Use of botanical and vitamin preparations in the prevention of gastric ulcers induced in rats by immobilization, noise and vibration
p0150 A82-23175
Perforated gastric and duodenal ulcers in servicemen
p0234 A82-30031
Effect of sensitization on development of stress gastric ulcers in rats
[NASA-TM-76868] p0385 N82-30892
Efficacy of cimetidin in the prevention of ulcer formation in the stomach during immobilization stress
[NASA-TM-76864] p0389 N82-30923

**ULTRAHIGH FREQUENCIES**
Distribution of heat in biological tissues under influence of UHF electromagnetic fields --- for tumor treatment
p0388 N82-30909

**ULTRASONIC CLEANING**
Preparation of ultraclean gloves for precision assembly operations
p0415 A82-47075
Acoustic tooth cleaner
[NASA-CASE-LAR-12471-1] p0357 N82-29862

**ULTRASONIC RADIATION**
Lack of effect of pulsed ultrasound on the mammalian EEG
p0005 A82-11030
Method for the determination of muscle cross-sectional area and dermato-adipose layer thickness using ultrasonic scanning
p0204 A82-27778
Effects of high-frequency ultrasound on adaptive changes in cell resistance
p0242 A82-31546
The effect of ultrasound and phonophoresis of ganglioblockers on the cardiovascular system in patients with cervical osteochondrosis
p0343 A82-41476
The mechanism of the action of low intensity ultrasound on mitochondria
p0420 A82-48207
Airborne ultrasound: Measurement and possible adverse effects
[PB81-240459] p0083 N82-15775

**ULTRASONIC SCANNERS**
Ultrasonic scanning in the diagnosis of retinoblastomas
p0410 A82-46710
The echography - Doppler experiment on Salyut 7 --- to monitor cardiac function and cardiovascular circulation by ultrasonic means
[IAF PAPER 82-23] p0414 A82-46916
Clinical ophthalmic ultrasound improvements
[NASA-CR-170432] p0424 N82-32972

**ULTRASONIC TESTS**
The use of ultrasonic Doppler techniques in the diagnosis of arterial occlusions in the basis cerebri - A Doppler angiography study
p0201 A82-27756
A practical ultrasonic plethysmograph
p0211 A82-28486
The effect of nitroglycerine on the functional state of the left ventricle in patients with acute myocardial infarction according to ultrasonic studies of the heart
p0279 A82-35679
Ultrasonic determination of thermodynamic threshold parameters for irreversible cutaneous burns
p0339 A82-41122
The measurements of fluid shifts and of the tissue compliance along body axis in man
[BMFT-FB-W-80-011] p0039 N82-13654
Informativeness of ultrasonic Doppler cardiography in evaluation of coronary circulation
p0132 N82-17828

**ULTRASONIC WAVE TRANSDUCERS**
Ultrasonic method for measuring of hepatic portal blood flow in rats under conditions of contact biomicroscopy
p0202 A82-27760
Computerized ultrasonic arteriography - A new technique for imaging the carotid bifurcation
p0257 A82-32880
Ultrasonic blood flow imaging using correlation processing
p0217 N82-20861

**ULTRASONIC WAVES**
U ULTRASONIC RADIATION

**ULTRASONICS**
An investigation of the ultrasound hemolysis of normal and pathological erythrocytes
p0419 A82-48204
Apparatus for disintegrating kidney stones
[NASA-CASE-GSC-12652-1] p0294 N82-26961
Echocardiography in the examination of pilots
p0399 N82-31937

**ULTRAVIOLET ABSORPTION**
Higher plant acclimation to solar ultraviolet-B radiation
p0031 N82-12737

**ULTRAVIOLET LIGHT**
U ULTRAVIOLET RADIATION

**ULTRAVIOLET MICROSCOPY**
Localization of adeninnucleotides in striated fibers of skeletal muscles
p0200 A82-27733

**ULTRAVIOLET RADIATION**
NT FAR ULTRAVIOLET RADIATION
NT NEAR ULTRAVIOLET RADIATION
Biologically damaging radiation amplified by ozone depletions
p0029 A82-15708
Organic chemical evolution of reducing model of the atmosphere of the primitive earth - Role of UV light and electric discharges
p0099 A82-20912
Ultraviolet selection pressure in the Prephanerozoic --- ancient microorganism survival
p0105 A82-20969
The combined use of sulfamonomethoxine and UV radiation in the treatment of chronic pneumonia
p0190 A82-25808
Plant response to solar ultraviolet radiation
p0195 A82-26582
Effects of ultraviolet-B irradiances on soybean. IV - Leaf ontogeny as a factor in evaluating ultraviolet-B irradiance effects on net photosynthesis
p0195 A82-26602
The effect of long-wave ultraviolet radiation on cyclophosphamide-induced levels of chromosome aberrations in the bone marrow cells of mice
p0310 A82-38556
Changes of the functional condition of the neocortex during direct application of optical radiation
p0374 A82-43655
A protective function of the coacervates against UV light on the primitive earth
p0403 A82-45592
Higher plant acclimation to solar ultraviolet-B radiation
p0031 N82-12737
Higher plant response to elevated ultraviolet irradiance
[NASA-CR-167538] p0213 N82-20828
The ultraviolet radiation environment of pollen and its effect on pollen germination
p0213 N82-20829
Protective mechanisms and acclimation to solar ultraviolet-B radiation in Oenothera stricta
p0213 N82-20830
Action spectra for photosynthetic inhibition
p0213 N82-20831
Technical assessment of the prevention of micro-fouling on OTEC heat-transfer surfaces through the use of ultraviolet radiation
[DE82-005489] p0356 N82-29850

**ULTRAVIOLET SPECTRA**
Organic and inorganic interpretations of the

Martian UV-IR reflectance spectrum
p0106 A82-21208

ULTRAVIOLET SPECTROGRAPHS
U ULTRAVIOLET SPECTROMETERS

ULTRAVIOLET SPECTROMETERS
Spectrophotometric studies on the RNA structure in E.coli ribosomes. Part 1: Fundamentals of ultraviolet spectrophotometry of nuclei acids
[ISS-R-80/2-PT-1] p0078 N82-15734

UNCONSCIOUSNESS
NT BLACKOUT PREVENTION
NT NARCOSIS

UNDERWATER ACOUSTICS
Supervisory control: Problems, theory and experiment for application to human-computer interaction in undersea remote systems
[AD-A116236] p0401 N82-31949

UNDERWATER ENGINEERING
Effect of local vibration on divers working under water
p0429 N82-33992

UNDERWATER EXPLOSIONS
The effects of underwater explosions on marine life in Shoalwater Bay, Queensland
[MRL-R-795] p0221 N82-21872

UNDERWATER PHOTOGRAPHY
Video framerate, resolution and grayscale tradeoffs for undersea telemanipulator
p0041 N82-13673

UNDERWATER PHYSIOLOGY
The contribution of V. N. Chernigovskii to the development of diving physiology and medicine
p0210 A82-28457
Effect of local vibration on divers working under water
p0429 N82-33992

NT BIOSATELLITES

UNSTEADY FLOW
Changes of the aggregation and orientation structure of blood in pulsating flow
p0095 A82-20333

URACIL
Uracil synthesis via HCN oligomerization --- chemical evolution of biomolecules in primitive earth
p0305 A82-38117

UREAS
Increased excretion of urea and N/tau/-methylhistidine by rats and humans after a bout of exercise
p0119 A82-21927
Isotopic analysis of leucine and urea metabolism in exercising humans
p0169 A82-24923
The effect of urea and heat on the activity of lactate dehydrogenase and glucose 6-phosphate dehydrogenase
p0313 A82-30612
Leucine and urea metabolism in acute human cold exposure
p0340 A82-41211
Influence on urea hydrolysis of typical microflora of urine and pressurized habitats
p0216 N82-20856
Metabolic changes in experimental animals as indicators of biological effects of 50 Hz electromagnetic fields
p0266 N82-24821

URINALYSIS
Serum and urinary cation changes on acute induction to high altitude /3200 and 3771 metres/
p0417 A82-47339

URINATION
Electrical stimulation of the urinary bladder following radical surgery for cancer of the rectum
p0343 A82-41479

URINE
The effect of acetazolamide on the proteinuria of altitude
p0073 A82-10739
Rhythms of electrolytes and hydroxyproline excretion in urine of rats after three weeks of weightlessness - Biosatellite Cosmos-1129
p0330 A82-40693
Toxicological and hygienic aspects of improving additional purification of water reclaimed from urine
p0125 N82-16718
Comparative evaluation of antimicrobial activity of some urine preservatives
p0132 N82-17830
Influence on urea hydrolysis of typical microflora of urine and pressurized habitats
p0216 N82-20856

USER MANUALS (COMPUTER PROGRAMS)
The Clinical Practice Library of Medicine (CPLM): An on-line biomedical computer library. System documentation
[NASA-CR-169018] p0294 N82-26964

USER REQUIREMENTS
Design criteria for decision aids - The users perspective
p0140 A82-22912
Development of a methodology for assessing aircrew workloads
[AD-A114364] p0355 N82-29010

UTERUS
Cervix-to-rectum measuring device in a radiation applicator for use in the treatment of cervical cancer

An evaluation of helicopter noise and vibration ride qualities criteria
[NASA-TM-83251] p0137 N82-17071

Physiological and hygienic rating of transport helicopter vibration damper
p0215 N82-20848

Effect of local vibration on divers working under water
p0429 N82-33992

VIBRATION DAMPERS
U VIBRATION ISOLATORS

VIBRATION DAMPING

The effectiveness of vibration damping at the working positions on open-pit excavators at the Kursk magnetic anomaly
p0187 A82-25699

Man under vibration: Suffering and protection --- Book
p0259 A82-33751

A survey of vibration control methods
p0261 A82-33768

Physiological and hygienic rating of transport helicopter vibration damper
p0215 N82-20848

VIBRATION EFFECTS

The reliability of flight personnel during the operation of the Mi-4 helicopter
p0087 A82-19014

Functional characteristics of receptors connected with sustaining the flight of the roach Periplaneta Americana L
p0110 A82-21716

Noise and vibration effects on vestibular and visual functions in teenagers
p0113 A82-21747

Use of botanical and vitamin preparations in the prevention of gastric ulcers induced in rats by immobilization, noise and vibration
p0150 A82-23175

Vibration sensitivity of workers in the main occupations of shipbuilding
p0155 A82-23299

Comparison of some technical methods for the evaluation of whole-body vibration
p0156 A82-23400

Certain neurohormonal and blood-coagulation changes in the case of early symptoms of vibration-related pathology in miners
p0160 A82-24504

The differential diagnosis of peripheral vasomotor impairments of vibrational and nonvibrational origin
p0160 A82-24507

The use of correlation analysis for the detection of signs of changes in the physiological condition of workers exposed to vibration
p0160 A82-24509

Basis for the refinement of permissible levels of local vibration
p0188 A82-25702

The permeability of the lymphatic vessels of the muscles of the upper extremities in vibration sickness
p0190 A82-25804

Effects of whole-body vibration and noise on the toxicity and risk parameters of chemical substances
p0191 A82-25814

Use of a constant magnetic field for the treatment of vibration sickness
p0205 A82-27796

Discomfort judgments of translational and angular whole-body vibrations
p0252 A82-32006

Man under vibration: Suffering and protection --- Book
p0259 A82-33751

Modern problems of vibrations in the systems 'man-machine-environment'
p0259 A82-33752

Effects of muscle vibration and joint oscillation on human motor mechanisms
p0259 A82-33753

Mechanoreceptor systems of the organism from the viewpoint of vibrational biomechanics
p0259 A82-33755

Immediate effects of vibration transmitted to the hand
p0260 A82-33756

Basic principles for hygienic rating of industrial whole-body vibration in the U.S.S.R.
p0260 A82-33757

Effects of vibrating tools on the peripheral vessels and the peripheral nervous system in workers of an iron foundry - Preventive suggestions
p0260 A82-33758

Comparative analysis of human and subhuman operator performance in a control loop
p0260 A82-33759

Dynamic modeling and vibratory response of human subjects in heave mode
p0260 A82-33761

Some problems of identification and modelling of the human body
p0260 A82-33762

Non-linear effects connected with the spatial vibrations of biomechanical systems
p0260 A82-33763

Vibration defence of man - Questions of modeling
p0260 A82-33764

Automatic system for study and measurement of vibration parameters affecting human body

**VIDEO DATA**
An approach to algorithms for processing data from the visual sensor of an integrated robot
p0026 A82-15681
A study of cerebral microvessels by means of automatic image analysis
p0202 A82-27766
Video framerate, resolution and grayscale tradeoffs for undersea telemanipulator
p0041 N82-13673

**VIDEO EQUIPMENT**
Review of health and safety aspects of video display terminals

[CRC-TN-712-E] p0179 N82-19816
A functional video-based anthropometric measuring system
[NASA-CR-167637] p0361 N82-29096
VIDICONS
Medical thermography with a pyroelectric vidicon camera
[BSRE-3365] p0389 N82-30921
VIEWING
NT FIELD OF VIEW
VIKING MARS PROGRAM
Interpretation of Viking biology experiments
p0371 A82-43221
VINYL COPOLYMERS
The utilization of macromolecules in blood purification systems
[NRC/CNR-TT-2021] p0358 N82-29064
VIRTUAL PROPERTIES
An investigation of the status of bone conduction audiometer calibration in the National Health Service
[NPL-AC-101] p0034 N82-12769
VIRUSES
NT BACTERIOPHAGES
The mathematics of immunity --- response to viral intrusion
p0119 A82-21824
The circadian rhythm of the sensitivity of the chromosome apparatus of mice to the mutagenic effect of measles
p0323 A82-40462
Conference on plant virology
p0082 N82-15767
Molecular interactions of high energy fuels and jet fuels with oncogenic viruses and endogenous viruses
[AD-A108377] p0174 N82-18855
Aspects of the body's defence mechanisms as protection against biological agents --- used in biological warfare
[DRIC-T-6433] p0223 N82-21886
USSR Report. Life sciences: Biomedical and behavioral sciences, no. 14
[JPRS-79973] p0265 N82-24806
Ultrastructural changes in central nervous system cells induced by arboviruses

Detection of amblyopia utilizing generated retinal reflexes
[NASA-CR-161944] p0127 N82-16732
Eye movements and visual information processing
[AD-A112399] p0300 N82-27967
Long-term and progressive changes in Rhesus spectral sensitivity after low-level coherent light (514nm exposure) --- effects of laser exposure on visual function
[AD-A111639] p0347 N82-28946
Cold weather goggles. 2: Performance evaluation
[AD-A114067] p0355 N82-29008
A cortically implantable multielectrode array for investigating the mammalian visual system
[AD-A115484] p0390 N82-30931
Zero-crossings and spatiotemporal interpolation in vision: Aliasing and electrical coupling between sensors
[AD-A117608] p0434 N82-34019
Assessment and development of oculomotor flying skills by the application of the channel theory of vision
[AD-A115325] p0436 N82-34035
A pilot study of human factors in SAR
[AD-A117917] p0444 N82-34087
VISORS
Cold weather goggles. 1: Optical evaluation
[AD-A111333] p0274 N82-25794
Holographic laser visor mock-up
[AD-A112422] p0303 N82-27990
VISUAL ACCOMMODATION
Motion sickness due to vision reversal - Its absence in stroboscopic light
p0066 A82-17451
The effects of age and ametropia on the dark focus of visual accommodation
p0142 A82-22929
Eyes and glass curtains - Visual accommodation, the Mandelbaum effect, and apparent size
p0146 A82-22967
Locus of the stimulus to visual accommodation - Where in the world, or where in the eye --- sources of visual perception errors
p0289 A82-37184
Model of the accommodative mechanism in the human eye
p0318 A82-39432
The dark focus of accommodation and pilot performance
p0406 A82-46266
VISUAL ACUITY
NT HYPEROPIA
Presbyopia in flight personnel - Its repercussions and correction
p0007 A82-12312
The prevalence of visual deficiencies among 1979 general aviation accident airmen
p0109 A82-21688
Low-level laser light effects - Long-term effects --- on visual acuity of behaviorally trained monkeys
p0140 A82-22913

Changes in spectral acuity following laser irradiation p0140 A82-22914

Performance evaluation tests for environmental research /PETER/ Landolt C reading test p0142 A82-22933

Item recognition as a Performance Evaluation Test for Environmental Research p0143 A82-22934

Contour curvature analysis - Hyperacuities in the discrimination of detailed shape --- human performance efficiency p0235 A82-30872

Visual acuity in color contrast on cathode ray tubes - Role of luminance, hue, and saturation contrasts p0252 A82-32010

Hyperacuity for luminance phase angle in the human visual system p0314 A82-38799

Aging and visual function of military pilots - A review p0320 A82-40435

The deterioration of the working efficiency of stereophotogrammetrists and their professional selection p0410 A82-46709

Influence of sine, and random, whole-body vibration on visual acuity [BMVG-FBWT-79-17] p0038 N82-13653

Prevalence of astigmatism among aviators and its limiting effect upon visual performance with the AN/PVS-5 flight vision goggles [AD-A112836] p0300 N82-27966

Determining visual acuity thresholds: A simulation study of stimulus presentation strategies [AD-A111821] p0353 N82-28992

Comparison of rhesus and human spectral dynamic visual acuity [AD-A115258] p0433 N82-34018

VISUAL AIDS

Computer simulation as a visual aid in a video course --- for ATC system performance p0088 A82-19248

Unconventional visual displays for flight training [AD-A111392] p0354 N82-28999

VISUAL CONTROL

An approach to algorithms for processing data from the visual sensor of an integrated robot p0026 A82-15681

The effect of visual information on the manual approach and landing p0379 N82-30837

Evaluation of a trajectory command concept for manual control of carrier approaches and landings p0440 N82-34060

Application of a pilot control strategy identification technique to a joint FAA/NASA ground-based simulation of head-up displays for CTOL aircraft p0440 N82-34061

VISUAL DISCRIMINATION

Mechanisms of temporal discrimination in the visual analyzer p0028 A82-15714

Disappearance of stabilized chromatic gratings --- visual contrast sensitivity p0049 A82-16125

Analysis of retinal work in the discrimination of a contour signal p0054 A82-16819

Comparison of memory tests for environmental research p0143 A82-22936

Bivariate response distributions in visual detection and discrimination p0144 A82-22951

Model of visual detection and discrimination p0145 A82-22952

Scaling of perceived optical distortion --- physical and psychological factors of visual stimuli p0147 A82-22968

The response of the microstructure of the cerebral subcommisural organ to a change in light cycle p0150 A82-23173

Contour curvature analysis - Hyperacuities in the discrimination of detailed shape --- human performance efficiency p0235 A82-30872

Contrast sensitivity at high velocities --- measurement of visual sensitivity to rapidly moving stimuli p0235 A82-30874

Conditioned tilt masking - A modified absolute judgment method is used to measure the oblique effect p0281 A82-35768

Narrowing of the visual field as an indicator of mental workload p0288 A82-36961

Discrimination and detection thresholds - The effect of observer criterion on the spatial properties of chromatic and achromatic mechanisms p0318 A82-39438

Detection/discrimination in the long-wavelength pathways --- human color vision tests p0318 A82-39439

Contrast increment thresholds of rhesus monkeys p0370 A82-43099

Absence of depth processing in the large-frame rod-and-frame effect --- human space perception p0378 A82-44823

A comparison of tracking with visual and kinesthetic-tactual displays p0405 A82-46258

Landing airplanes, detecting traffic, and the dark focus --- experiments on pilot visual misperception in darkness accommodation p0406 A82-46265

The efficiency of detecting tribar patterns modulated in random dot density [IZF-1980-25] p0036 N82-12779

Visual problems in aviation and space navigation p0081 N82-15758

VTOL/STOL visual study [NASA-CR-166292] p0137 N82-17872

Distraction in visual search [IZF-1981-7] p0268 N82-24830

The ranking of displays based on transinformation --- as a measure of tracking performance [FB-52] p0354 N82-29001

Distance estimation in projected photographs --- visual estimates [FOA-C-56031-H2] p0426 N82-32982

Neuron selectivity: Single neuron and neuron networks [AD-A116886] p0433 N82-34013

An EEG predictor of performance decrement in a vigilance task [AD-A116960] p0433 N82-34014

VISUAL DISPLAYS

U DISPLAY DEVICES

VISUAL FIELDS

The effects of a light blue background on the operator visual analyzer p0052 A82-16727

Oculoparalytic illusion - Visual-field dependent spatial mislocalizations by humans partially paralyzed with curare p0208 A82-28250

Narrowing of the visual field as an indicator of mental workload p0288 A82-36961

Landing airplanes, detecting traffic, and the dark focus --- experiments on pilot visual misperception in darkness accommodation p0406 A82-46265

Automated visual field screening in the flying Dutch population p0408 A82-46535

VISUAL FLIGHT

Evaluation of the visual acquisition range of enroute air traffic from cockpit observations --- collision avoidance [ESA-TT-691] p0175 N82-18861

The effect of visual information on the manual approach and landing [NLR-TR-80055-U] p0181 N82-19836

The effect of visual information on the manual approach and landing p0437 N82-34081

VISUAL OBSERVATION

An investigation of the visual observations made by cosmonauts under experimental and actual conditions p0156 A82-23305

Conspicuity of observation posts at the air weapon firing ranges on the Vliehors and the Noordvaarder [IZF-1979-33-E] p0035 N82-12774

Field sensitivity of the 'red' mechanism derived from primate local electroretinogram
p0318 A82-39431
Effect of chromatic adaptation on the achromatic locus - The role of contrast, luminance and background color
p0318 A82-39433
Neurons in cat visual cortex tuned to the direction of motion in depth - Effect of positional disparity
p0318 A82-39434
Global visual processing for saccadic eye movements
p0318 A82-39435
Retinal location and visual localization during pursuit eye movement
p0318 A82-39436
Detection/discrimination in the long-wavelength pathways --- human color vision tests
p0318 A82-39439
An LED system for the formation of visual stimuli
p0323 A82-40471
Mode of mutual influence of stimulation-characteristics in the visual processing system --- German thesis
p0341 A82-41445
The influence of afferent visual impulses on the morphological and biochemical parameters of the development of the neurons of the visual, motor, and parietal cerebral cortices
p0369 A82-42636
Three stimuli for visual motion perception compared
p0370 A82-42900
Dynamics of the process of the determination of orientation by man
p0371 A82-43231
Factors determining the characteristics of the perception of stabilized retinal images
p0371 A82-43232
Absence of depth processing in the large-frame rod-and-frame effect --- human space perception
p0378 A82-44823
Inhibition of the rod-and-frame effect by circular contours --- human depth perception
p0378 A82-44824
Steady state visual evoked potentials in the alert primate
p0403 A82-45673
Spectral sensitivity of the peripheral retina to large and small stimuli
p0403 A82-45675
Fractional rates of change as functional optical invariants --- deceleration and descent judgment experiments on flight simulator
p0406 A82-46268
Ways to increase the work capacity of persons subjected to prolonged sensory overloads
p0409 A82-46696
The vestibulo-ocular reflex in man during voluntary head oscillation under three visual conditions
p0416 A82-47334
Determining visual acuity thresholds: A simulation study of stimulus presentation strategies
[AD-A111821] p0353 N82-28992

VISUAL TASKS
Visual fatigue and cathode ray tube display terminals
p0017 A82-12870
A single-channel model does not predict visibility of asynchronous gratings
p0024 A82-15358
Experimental study of the characteristics of the detection of objects on a TV display by an operator under conditions of time deficit
p0051 A82-16714
Informational need of emotional stress --- effect on operator performance of visual tasks
p0058 A82-16943
Differences in eye movement data recorded by electro-oculography and corneal reflection techniques
p0088 A82-19224
EEG evaluation of mental stress
p0116 A82-21784
Instrument scan - Is it an indicator of the pilot's workload
p0141 A82-22924
The event-related brain potential as an index of attention allocation in complex displays
p0142 A82-22928
Systems analysis of the EEG during signal discrimination tasks --- alpha and beta rhythms
p0165 A82-24831
The evaluation of information display on the basis of the transinformation --- German book
p0209 A82-28394
Evidence for a boundary effect in roll vection
p0212 A82-28500
Evaluation of human operator reliability according to physiological data
p0236 A82-31155

The effects of hypoxia on serial response time
p0254 A82-32390

Statistical techniques for instrument panel arrangement
p0287 A82-36959

A method for semi-automatic analysis of eye movements
p0288 A82-36960

Narrowing of the visual field as an indicator of mental workload
p0288 A82-36961

Eye movement measurement in the assessment and training of visual performance
p0288 A82-36962

Global visual processing for saccadic eye movements
p0318 A82-39435

Participation of the prefrontal cortex in delayed spatial choice and differentiation of time intervals in rhesus monkeys
p0323 A82-40470

Sinusoidal and random whole-body vibration - Comparative effects on visual performance
p0408 A82-46534

The efficiency of detecting tribar patterns modulated in random dot density
[IZF-1980-25] p0036 N82-12779

Distraction in visual search
[IZF-1981-7] p0268 N82-24830

Combined discrete network. Continuous control modelling of operator behavior
p0440 N82-34064

A model of human decision making in multiple process monitoring situations
p0440 N82-34065

YEAST
Mechanism of the effects of vacuum on microorganisms
p0164 A82-24551
New data on reverse electron transport in the respiratory chains of yeast mitochondria - The induction of reverse transport by exogenous NAD-H
p0228 A82-29445
The effect of laser radiation on lipid synthesis in yeast
p0311 A82-38585
Microbial ecology of extreme environments: Antarctic dry valley yeasts and growth in substrate limited habitats
[NASA-CR-168742] p0220 N82-21869

YOUTH
Investigation and evaluation of cardiac arrhythmias in healthy young persons
p0110 A82-21710
Predicting the potentials of young swimmers based on clinical and physiological data
p0118 A82-21814

YTTRIUM
NT YTTRIUM ISOTOPES

YTTRIUM ISOTOPES
Asymmetrical radical formation in beta-irradiated D- and L-alanines
p0103 A82-20949

Z

ZEOLITES
A new concept in life support systems - The NGL molecular sieve oxygen generator
p0156 A82-23370

ZERO GRAVITY
U WEIGHTLESSNESS

ZINC
Mechanisms of cadmium absorption in rats
[PB82-108184] p0123 N82-16703

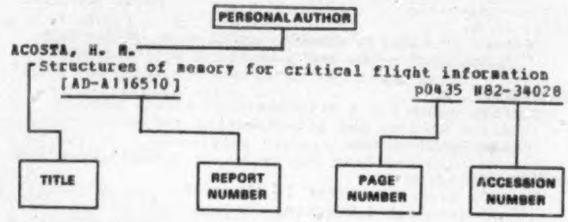
ZIPPERS
Zipper rear closure endurance testing
[AD-A104732] p0037 N82-12785

# PERSONAL AUTHOR INDEX

**AEROSPACE MEDICINE AND BIOLOGY** / *a continuing bibliography* JANUARY 1983

1982 Cumulative Index

### Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title. Under any one author's name the accession numbers are arranged in sequence with the *IAA* accession numbers appearing first.

## A

**AARONS, D.**
Research on the development of a statistical impact acceleration injury prediction model from -G(x) accelerator runs
[AD-A116440] p0431 N82-34003

**ABBOTT, R. A.**
Effect of induced erythrocythemia on hypoxia tolerance during physical exercise
p0341 A82-41218

**ABBOTT, U. K.**
Embryonic development during chronic acceleration
p0337 A82-40755

**ABDIKALIEV, N. A.**
Prevention of hypoxic heart damage by the use of oxypyridine-class antioxidants
p0055 A82-16821
Pathogenesis and prevention of the hypoxic contraction of the heart
p0164 A82-24552

**ABDVAKHITOVA, A. K.**
Investigation by means of a fluorescent probe of changes in cellular membranes of fibroblasts of the Chinese hamster under laser and X-ray irradiation
p0278 A82-35660

**ABDYLDAEV, A. A.**
Morphofunctional changes in the rabbit myocardium during chronic solar thermal overheating
p0161 A82-24516

**ABE, M.**
Effect of physical fitness and training on physiological responses to hypogravity
p0057 A82-16933
Effect of athletic training on physical fitness under hypodynamics
p0327 A82-40663
Relation between physiological effects of gravitational forces and that of magnetic forces
p0334 A82-40730
Relation between physiological effects of gravitational forces and that of magnetic forces. II
p0338 A82-40771

**ABELL, P. I.**
Comets and the origin of life - The stable isotope approach
p0096 A82-20864

**ABRAHAM, S.**
Studies of specific hepatic enzymes involved in the conversion of carbohydrates to lipids in rats exposed to prolonged spaceflight aboard Cosmos 1129
p0331 A82-40698

**ABRAHAM, W. M.**
Influence of exercise intensity and duration on biochemical adaptations in skeletal muscle
p0417 A82-47378

**ABRAITIS, R. I.**
Changes with age in the cholin- and adrenergic innervation of the human heart
p0152 A82-23268

**ABRAMOV, B. D.**
Concerning the investigation of the condition of the cardiovascular system in experiments on animals
p0412 A82-46873

**ABRAMOVA, E. M.**
Studies directed toward improving hygienic standards pertaining to total-body vibration resulting from heavy moving equipment
p0368 A82-42619

**ABRAMOVA, G. M.**
Clinical distinctions of radiation sickness with exposure of different parts of the human body to radiation
p0126 N82-16726

**ABRAMOVICH-POLIAKOV, D. K.**
The permeability of the lymphatic vessels of the muscles of the upper extremities in vibration sickness
p0190 A82-25804

**ABROSOV, N. S.**
Theoretical and experimental analysis of material turnover in a closed microecosystem. I - Construction of a mathematical model
p0191 A82-25821

**ABULADZE, L. A.**
The use of an audio-frequency magnetic field in certain diseases
p0343 A82-41473

**ABUSHKEVICH, V. G.**
Functional means for the regulation of heart rhythm during burst stimulation of the vagus nerves
p0373 A82-43632

**ABYZOV, R. A.**
Characteristics of pharmacotherapeutic complications in otolaryngology /Review of the literature/
p0369 A82-42628

**ABYZOV, S. S.**
Mycelial fungi, isolated from the ice sheet of the central Antarctic
p0317 A82-39428
The microflora of the central Antarctica glacier and control methods for the sterile isolation of an ice core for microbiological analyses
p0318 A82-39430

**ACKLES, K. N.**
The effects of hypoxia on serial response time
p0254 A82-32390

**ACLAND, N. D.**
Ambiguity and the evolution of the genetic code
p0305 A82-38120

**ACOSTA, H. M.**
Structures of memory for critical flight information
[AD-A116510] p0435 N82-34028

**ACREE, C. W., JR.**
Pilot estimates of glidepath and aim point during simulated landing approaches
[NASA-TM-81325] p0035 N82-12772

**ADACHI, R. R.**
Bone resorption and calcium absorption in rats during spaceflight
p0331 A82-40704

ADAIR, E. R.
Adjustments in metabolic heat production by squirrel monkeys exposed to microwaves
p0230 A82-29569

ADAIR, T. H.
Functional diagrams of flow and volume for the dog's lung
p0230 A82-29567

ADALIS, D.
Determination of the effects of material from alternate energy sources on the upper respiratory tract clearance mechanism. Part 1: In vitro exposure to particulate pollutants. Part 2: In vivo exposure to ozone
[PB82-117037] p0178 N82-19811

ADAMEC, M.
Simulation of human reactions under extreme conditions
p0057 A82-16934

ADAMIAN, K. G.
A comparative evaluation of the structural features of the diurnal rhythms of the cardiovascular system in healthy individuals and in patients with ischemic heart disease
p0410 A82-46715

ADAMIAN, S. IA.
Temperature characteristics of the ouabain-insensitive sodium flux in frog muscles
p0312 A82-38600

ADAMS, B. W.
Adjustments in metabolic heat production by squirrel monkeys exposed to microwaves
p0230 A82-29569

ADAMS, E. M.
Evidence for diminished sensitivity of the hamster pulmonary vasculature to hypoxia
p0285 A82-36035

ADAMS, R. P.
A critical value for O2 transport in the rat
p0375 A82-44141

ADAMS, W. J.
Aircrew windblast protection concepts, development and evaluation
[AD-A115424] p0401 N82-31947

ADLER, B.
Sigma-movement and Sigma-nystagmus - A new tool to investigate the gaze-pursuit system and visual-movement perception in man and monkey
p0066 A82-17450

ADLER, R. E.
Plan of action and milestones for Navy combustion toxicity
[AD-A105623] p0075 N82-14796

AFANASEV, IU. A.
Vibration sensitivity of workers in the main occupations of shipbuilding
p0155 A82-23299

AFANASEV, IU. I.
The structure and function of macrophages
p0342 A82-41470

AFANASEV, S. S.
Current views of anaphylaxis as one of the forms of manifestation of the body's reactivity
p0413 A82-46891

AFANASYEV, O. V.
Measuring/computing complex for automation of ergonomic experiments
p0012 N82-11765

AFONIN, B. B.
Role of hormonal compounds in regulation of electrolyte metabolism in the presence of emotional stress
p0348 N82-28952

AFONIN, N. I.
Study of the kinetics of oxygen saturation of fluorocarbon emulsions
[ISSN-0077-5606] p0178 N82-19810

AGADZHANIAN, N. A.
Pulmonary diffusing capacity under conditions of restricted motor activity
p0061 A82-17140
Circadian rhythm dynamics under conditions of an altered gaseous medium and hypokinesia
p0235 A82-31151

AGARWAL, G. C.
Effects of muscle vibration and joint oscillation on human motor mechanisms
p0259 A82-33753
Computational problems in autoregressive moving average (ARMA) models
p0044 N82-13698
Modeling of human operator dynamics in simple manual control utilizing time series analysis
p0379 N82-30834
Modeling of human operator dynamics in simple manual control utilizing time series analysis
p0436 N82-34038

AGARWELL, G. C.
Load compensating reactions to perturbations at wrist joint in normal man
p0045 N82-13708

AGIN, A. K.
Effects of video bandwidth compression processing on operator performance in the Mini-RPV system
p0145 A82-22957

AGSTERIBBE, E.
Similar genes for a mitochondrial ATPase subunit in the nuclear and mitochondrial genomes of Neurospora crassa
p0314 A82-38698

AHARON, N.
Protein kinase activity in liver of heat-acclimated hamsters
p0376 A82-44145

AHLERS, I.
Space flight effects upon plasma and tissue lipids in rats
p0333 A82-40722

AHLERS, J.
Plasma and tissue lipids of rats following flight aboard Cosmos-936 biosatellite
p0271 N82-25767
Plasma and tissue lipids of rats following flight aboard the Cosmos-1129 biosatellite
p0271 N82-25768

AHLERSOVA, E.
Space flight effects upon plasma and tissue lipids in rats
p0333 A82-40722

AHMED, S. M.
Experimental study of high density foods for the Space Operations Center
p0248 N82-23109

AHRENS, T. J.
Impact of an asteroid or comet in the ocean and extinction of terrestrial life
[NASA-CR-169086] p0293 N82-26955

AIDARALIEV, A. A.
Adaptation to high-altitude hypoxia at different ambient temperatures /before and during adaptation/
p0110 A82-21715

AIDARALIEV, A. D.
Evaluation of the functional state existing in the adaptation to high-altitude conditions
p0282 A82-35836

AIVAZIAN, T. A.
The influence of psychological and somatic factors on the symptomatics of hypertension
p0344 A82-41492

AIVAZOVA, D. KH.
The effects of successive ionizing radiation and heat on antibody formation
p0113 A82-21751

AIZIKOV, G. S.
Characteristics of the lifting reflex in albino rats following prolonged space flight /Effects of weightlessness and artificial gravity/
p0152 A82-23262

AIZMAN, R. I.
The effects of an aqueous potassium loading test on kidney function
p0094 A82-20329

AJELLO, J. M.
Organic and inorganic interpretations of the Martian UV-IR reflectance spectrum
p0106 A82-21208

AKABOSHI, M.
Asymmetrical radical formation in beta-irradiated D- and L-alanines
p0103 A82-20949

AKERT, K.
A transsynaptic autoradiographic study of the pathways controlling the extraocular eye muscles, using /I-124/B-IIb Tetanus toxin fragment
p0065 A82-17441

**AKHALAIA, M. IA.**
The effect of cold stress on the level and activity of microsomal cytochrome P-450 in the rat liver
p0112 A82-21732

**AKHAVI, M. S.**
Follow-up of 14 abnormal electroencephalograms in asymptomatic U.S. Air Force Academy cadets
p0194 A82-26242

**AKHMADIYEVA, A. K.**
Effect of transmeridional flights on biorhythm of zone formation by Streptomyces levoris
p0124 N82-16711

**AKHMEDIANOVA, Z. U.**
The significance of the changes in the chorioretinal structures for the mechanism of the therapeutic action of the argon laser /experimental study/
p0410 A82-46712

**AKHMEDOV, R.**
Effect of high ambient temperature on carbohydrate metabolism in rat liver and skeletal muscles
p0351 N82-28975

**AKHMEDOV, T. I.**
Effects of emotional stress in bus drivers
p0191 A82-25819

**AKHMETOVA, G. K.**
The self-stimulation response in cats in a nitrogen-oxygen medium under elevated pressure
p0024 A82-15351

**AKHREM, A. A.**
Theoretical conformational analysis of the neuropeptide inducing delta sleep
p0241 A82-31531

**AKHTAR, M.**
Serum and urinary cation changes on acute induction to high altitude /3200 and 3771 metres/
p0417 A82-47339

**AKHUNDOV, K. M.**
Effects of high ambient temperature on athlete adaptation to muscular activity
p0188 A82-25706

**AKHVERDYAN, L. A.**
Mortality in acute myocardial infarction as function of geomagnetic field activity in Yerevan
p0134 N82-17852

**AKIFEV, A. P.**
Radiation-induced shortening of the life span of D. melanogaster. II - Sensitizing effects of 5-bromo-2-deoxyuridine
p0306 A82-38155

**AKIMOV, V. N.**
Cochlear analysis of sound intensity and some mechanisms of auditory sensations
p0116 A82-21792

**AKOEV, I. G.**
Microdosimetric analysis of the variability of radiobiological effects in experiments with high-energy radiation
p0206 A82-27810

Structural changes of the plasmatic membrane under the effect of ionizing radiation
p0278 A82-35661

The modification of radiation damage by dibasic sulfur-containing phenol acids
p0404 A82-45784

**AKOPIAN, G. A.**
The speed of blood flow in athletes subjected to the combined action of a training regime and high-altitude climatic factors
p0344 A82-41505

**AKOPIAN, N. S.**
The effect of adrenergic substances on cardiac activity and brain electrical activity in the rabbit under hypoxia
p0007 A82-12299

The effect of acute hypoxia on the EEG and unit impulse activity of neurons of different brain structures in rats
p0286 A82-36172

**AKOPIAN, V. B.**
An investigation of the ultrasound hemolysis of normal and pathological erythrocytes
p0419 A82-48204

**AKOPIAN, V. S.**
The significance of the changes in the chorioretinal structures for the mechanism of the therapeutic action of the argon laser /experimental study/
p0410 A82-46712

**AKOPOV, A. IU.**
Human predictive ability in univocally determined situations for normal and pathological states
p0162 A82-24532

**AKOYEV, I. G.**
Effect of transmeridional flights on biorhythm of zone formation by Streptomyces levoris
p0124 N82-16711

Current problems of radiobiology of electromagnetic radiation of radio-frequency range
p0134 N82-17850

Structural changes in plasma membrane under influence of ionizing radiation
p0430 N82-33993

**AKULININ, A. I.**
Affections of the upper respiratory tracts in transport-fleet sailors and the prophylaxis of these affections on long voyages
p0281 A82-35696

**AKUTSU, Y.**
Statistical mechanics of biomembrane phase transition. I - Excluded volume effects of lipid chains in their conformation change
p0199 A82-27561

**AL-MUFTI, S.**
Organo-siliceous biomolecules and the infrared spectrum of the Trapezium nebula
p0404 A82-46182

**ALARIE, Y.**
Toxicity of carbon monoxide, hydrogen cyanide and low oxygen
p0404 A82-46200

**ALATYREV, V. I.**
Investigation of recurrent inhibition in the human spinal cord during static skeletal muscle activity
p0094 A82-20330

**ALAVERDIAN, A. N.**
The effects of bicycle ergometer exercise on plasma amino acid contents in athletes
p0062 A82-17145

Early diagnosis of overstrain of the cardiovascular system in athletes engaging in cyclic forms of sport
p0278 A82-35664

**ALDERSONS, A. A.**
Phase analysis of dynamics of galvanic skin responses in man
p0357 N82-29861

**ALEC, K. P.**
Role of the thyroid gland during adaptation of skeletal muscles to increased motor activity
[NASA-TM-76871] p0384 N82-30884

**ALEINIKOV, IU. P.**
Possible model representations of the neurophysiological mechanisms for the analysis of the direction and speed of a moving visual object
p0053 A82-16807

**ALEINIKOVA, L. I.**
The detection of premorbid states and cardiovascular diseases during medical examinations of seamen
p0309 A82-38553

**ALEINIKOVA, L. T.**
Graded physical-exercise loads in the period right after myocardial infarction
p0411 A82-46722

**ALEINIKOVA, T. V.**
Possible model representations of the neurophysiological mechanisms for the analysis of the direction and speed of a moving visual object
p0053 A82-16807

**ALEKHINA, R. M.**
Changes in microcirculatory flow with respiratory insufficiency
p0094 A82-20323

**ALEKSANDROV, I. A.**
Harmful effects of temperature under conditions of elevated pressure in a helium-oxygen environment
p0027 A82-15706

**ALEKSANDROV, O. V.**
Changes in microcirculatory flow with respiratory insufficiency
p0094 A82-20323

**ALEKSANDROV, P. N.**
The microcirculatory bed of the lungs after an effect exerted on the right vagus nerve

p0325 A82-40497
ALEKSANDROV, V. N.
Migration kinetics of hemopoietic stem cells in mice after severe mechanical trauma
p0309 A82-38541
ALEKSANDROVA, N. V.
The carbohydrase system of the small intestine of rats of various ages following heat and cold exposures
p0257 A82-33135
ALEKSANIAN, Z. A.
The adaptive control of vegetative processes
p0374 A82-43652
ALEKSEENKO, A. V.
Criterion for the evaluation of arterial pressure response to bicycle ergometer exercise during treatment for hypertension
p0152 A82-23267
ALEKSEEV, B. I.
Results of morphological investigations aboard biosatellites Cosmos
p0330 A82-40697
ALEKSEEV, G. I.
Ways to increase the work capacity of persons subjected to prolonged sensory overloads
p0409 A82-46696
ALEKSEEV, O. V.
Mathematical modeling of microhemodynamics in the resistant part of the regional vascular bed
p0205 A82-27790
ALEKSEEV, S. I.
Effects of a high-frequency electromagnetic field on tetraphenyl borate transport through bilayer lipid membranes
p0200 A82-27744
The mechanism of the microwave effect on the conductivity of bilayer lipid membranes
p0312 A82-38587
ALEKSEEV, V. N.
Pulse rate evaluation of the relative physiological intensity of aerobic muscular work
p0094 A82-20331
The dynamics of heart rate recovery following work of various aerobic intensities
p0118 A82-21815
Some physiological mechanisms for the effects of the hypothalamus on erythron
p0196 A82-26753
ALEKSEEV, V. V.
Competition between algae in a flow system
p0240 A82-31517
ALEKSEEVA, L. V.
The modification of radiation damage by dibasic sulfur-containing phenol acids
p0404 A82-45784
ALEKSEEVA, V. K.
Study of the kinetics of oxygen saturation of fluorocarbon emulsions
[ISSN-0077-5606] p0178 N82-19810
ALEKSEUEV, I. I.
Preparation of labyrinthectomied animals for flight aboard Cosmos-936 biosatellite
p0350 N82-28971
ALEKSEYEV, V. N.
Results of studies of cosmonauts' vestibular function and spatial perception
p0214 N82-20838
ALESHKO-OZHEVSKII, IU. P.
Specialized acidophilic products for the nourishment of athletes
p0240 A82-31514
ALEV, K. P.
Adaptation of skeletal and cardiac muscle to elevated motor activity in hypo- and athyreotic rats
p0241 A82-31527
ALFEROVA, I. V.
Investigation of the cardiovascular system during prolonged space flights on board the Salyut space stations
p0317 A82-39429
Results of study of hemodynamics and phase structure of the cardiac cycle during functional test with lower body negative pressure during 140-day Salyut-6 station flight
p0126 N82-16722
Dynamics of left ventricular systolic phase structure during long-term (140-185 days) spaceflights
p0348 N82-28954
ALFEROVA, T. V.
Age characteristics of fatigue during local muscular work in humans
p0238 A82-31487
ALFORD, D. K.
Controlled Ecological Life Support System: Use of Higher Plants
[NASA-CP-2231] p0260 N82-24834
ALIEVSKAIA, L. L.
Effect of calcium on the temporal characteristics of muscle contraction
p0109 A82-21708
ALIKHANOVA, L. I.
Effects of increased carbohydrate resources on aerobic work capacity /Carbohydrate loading method/
p0203 A82-27777
ALLAKHVERDIEV, S. I.
Effects of reversible manganese extraction on the light reactions of photosystem II preparations
p0231 A82-29816
ALLARD, P.
Current clinical approaches to mediastino-pulmonary sarcoidosis
p0232 A82-29993
Spontaneous pneumothorax in a military environment
p0233 A82-29994
ALLEN, L. J.
Finite element analysis of the visco-elastic interaction of the annulus fibrosis and nucleus pulpocis within the human intervertegral joint
[AD-A111161] p0300 N82-27971
ALLEN, R. W.
Using rewards and penalties to obtain desired subject performance
p0042 N82-13684
A theory of human error
p0046 N82-13716
Stability analysis of automobile driver steering control
p0047 N82-13717
Detecting human operator impairment with a psychomotor task
p0047 N82-13718
ALLEN, W. C.
Assessing emergency interface design
p0405 A82-46256
ALLIK, IU. K.
Selective visual adaptation and the feature model
p0168 A82-24906
ALLIK, T. A.
Phosphorylating oxidation during changes in physiological condition
p0202 A82-27762
ALLIKMETS, L. KH.
The influence of the GABA-receptor blocker bicuculline on the effects of fenibut and diazepam
p0308 A82-38539
ALLISON, T. G.
Effect of induced erythrocythemia on hypoxia tolerance during physical exercise
p0341 A82-41218
ALLUISI, E. A.
Theories of vigilance - A modern perspective
p0146 A82-22964
ALMAZOV, V. A.
Electron-histochemical and functional evaluation of the effects of aspirin on the thrombocytes of healthy people and patients with ischemic heart disease
p0204 A82-27784
ALOV, I. A.
Mechanisms of the reaction of dividing cells to hypothermia
p0201 A82-27750
ALPATOV, I.
Support role of aviation physicians
p0265 N82-24809
ALPEROVICH, B. E.
Early diagnosis of overstrain of the cardiovascular system in athletes engaging in cyclic forms of sport
p0278 A82-35664
ALTLAND, P. D.
Effect of altitude exposure on induction of Streptococcal endocarditis in young and middle-aged rats
p0073 A82-18740

**ALTMAN, IA. A.**
Auditory depth perception - Localization of nonmoving and moving sound sources
p0111 A82-21727
Signal analysis at the periphery of the auditory system
p0277 A82-35248
Characteristics of human auditory evoked potentials during the lateralization of a 'moving' auditory image
p0323 A82-40465

**ALTUKHER, G. M.**
Calculation of the isochromatics and isoclinics of the cornea
p0241 A82-31530

**ALTYMYSHEV, A. A.**
Adaptation to high-altitude hypoxia at different ambient temperatures /before and during adaptation/
p0110 A82-21715

**ALWIS, K. W.**
Clay-mediated reactions of HCN oligomers - The effect of the oxidation state of the clay
p0099 A82-20917
Chemical evolution. XL - Clay-mediated oxidation of diaminomaleonitrile
p0339 A82-41196

**ALYUKHIN, Y. S.**
The efficiency coefficient of the rat heart and muscular system after physical training and hypokinesia
[NASA-TM-76843] p0245 N82-22868

**AMARANTOVA, G. G.**
Energy-dependent transport of Ca/2+/ and lipid peroxidation in sarcoplasmatic reticular muscle membranes in hypokinetic rats
p0151 A82-23258

**AMBARTSUMIAN, T. G.**
Temperature characteristics of the ouabain-insensitive sodium flux in frog muscles
p0312 A82-38600

**AMERSON, T. L., JR.**
The dark focus of accommodation and pilot performance
p0406 A82-46266

**AMERY, A.**
Hemodynamic response to converting enzyme inhibition at rest and exercise in humans
p0375 A82-44135
Plasma prostaglandins, renin, and catecholamines at rest and during exercise in hypertensive humans
p0418 A82-47382

**AMIN, A.**
Lack of effect of pulsed ultrasound on the mammalian EEG
p0005 A82-11030

**AMIRAGOVA, M. G.**
The correlations of the central nervous system and thyroid functions in conditions of chronic emotional stress
p0322 A82-40453

**AMIRKHANYAN, Y. A.**
Morphological distinctions of Macaca rhesus monkey thyroid under normal and various types of hypokinetic conditions
p0395 N82-31908

**AMORETTI, R.**
The contribution of cardiac mechanograms in the evaluation of pilots
p0399 N82-31936

**AMOSOVA, E. N.**
The prognostic significance of electrocardiotopogram parameters in macrofocal myocardial infarction
p0204 A82-27783

**AMROIAN, E. A.**
Prostoglandins and regulation of cerebral circulation under conditions of the altered gaseous composition of the blood
p0310 A82-38561

**ANANEV, B. R.**
The conditions attending muscular strain in work involving only a few types of movements

Effect of sensitization on development of stress gastric ulcers in rats
[NASA-TM-76860] p0385 N82-30892

POBEREZHNSKAIA, A. C.
The conditions attending muscular strain in work involving only a few types of movements
p0311 A82-38569

POCHUKAYEVA, L. S.
Morphology and coagulant function of human blood system during long exposure to low ammonia concentrations in a sealed environment
p0394 N82-31903

PODGORNAIA, E. IU.
Elevation of hypoxia tolerance under the influence of prolonged fasting
p0186 A82-25679

PODKLETNOV, N. E.
New data on abiogenic synthesis of prebiological compounds in volcanic processes
p0090 A82-20017

PODLUDNAIA, Z. A.
The interaction of alpha-actinin and tropomyosin with F-actin
p0199 A82-27727

PODVIGIN, N. F.
Electrical stimulation of the exterior geniculate body induces eye movements
p0229 A82-29448

POGGIO, T.
Zero-crossings and spatiotemporal interpolation in vision: Aliasing and electrical coupling between sensors
[AD-A117608] p0434 N82-34019

POGLAZOV, B. F.
The interaction of actin with phosphorylase kinase
p0228 A82-29434

POGODIN, M. A.
The significance of airflow resistance to changes in responses to increasing hypercapnia
p0094 A82-20327

POGOMOLOV, V. V.
Anesthesia, surgery and resuscitation during manned spaceflights
p0393 N82-31894

POGORELYI, V. E.
Effects of pyrroxane and methylapogalantamine on cerebral blood circulation and oxygen regime
p0115 A82-21776

POGOSIAN, IU. A.
The speed of blood flow in athletes subjected to the combined action of a training regime and high-altitude climatic factors
p0344 A82-41505

POGOZHEVA, I. D.
Rhodopsin aggregation under the damaging effects of light on the photoreceptor membranes
p0109 A82-21705
Photodamage to the rhodopsin molecule - SH-group oxidation
p0153 A82-23275

POGREBINSKII, S. A.
An LED system for the formation of visual stimuli
p0323 A82-40471

POIMANOV, V. P.
Directed training of wrestlers in the biofeedback control of physical work intensity according to heat rate
p0158 A82-24480

POIRIER, J. L.
Orthostatic tests during cosmonaut selection
p0316 A82-38854
Physiopathology and pathology of spinal ailments in aerospace medicine
[AGARD-AG-250-FR] p0011 N82-10720
Backache in helicopter pilots
p0360 N82-29887

POIRIER, J.-L.
Performance degradation during 18 Hz vertical sinusoidal vibrations
p0408 A82-46313

POKROVSKAIA, L. A.
The state of hemodynamics under the effect of laser radiation
p0368 A82-42613

POKROVSKII, B. V.
Reception of retinol in rat retinas - Various molecular forms
p0187 A82-25687

POKROVSKII, A. V.
Functional means for the regulation of heart rhythm during burst stimulation of the vagus nerves
p0373 A82-43632

POKROVSKII, V. A.
The relationship between cardiac and motor components of a conditioned reflex upon the local cooling of various zones of the cerebral cortex in cats
p0116 A82-21787
Functional means for the regulation of heart rhythm during burst stimulation of the vagus nerves
p0373 A82-43632

POLESHCHUK, N. K.
Thermoregulatory responses to local convective and radiative cooling
p0017 A82-12951

POLEVAIA, O. IU.
The induction of the formation of morphine-binding spleen cells as a manifestation of the immune response
p0413 A82-46888

POLEVOI, V. V.
ATPase activity and the potassium ion permeability of erythrocyte membranes in the presence of serotonin and radiation
p0324 A82-40479

POLIAK, L. M.
Thermoregulation and morbidity in coal miners
p0191 A82-25815

POLIAKOV, E. L.
The self-stimulation response in cats in a nitrogen-oxygen medium under elevated pressure
p0024 A82-15351

POLIAKOVA, A. P.
Investigation of the cardiovascular system during prolonged space flights on board the Salyut space stations
p0317 A82-39429

POLIAKOVA, G. A.
Physiological and hygienic evaluation of the work of female tower crane operators
p0160 A82-24512

POLIAKOVA, M. I.
Cardiac function in surgical tuberculosis patients under conditions of prolonged bed rest
p0161 A82-24519

POLIAKOVA, T. S.
Significance of the rehydration rate of the inner ear in the choice of method of surgical intervention in the endolymphatic system in Meniere's disease
p0261 A82-34473
Application of xylite for the detection of labyrinthine hydrops
p0316 A82-39243

POLIANSKAIA, T. N.
Certain characteristics of the physiological basis of work-rest regimes for rolling mill operators
p0160 A82-24506

POLIANTSEV, V. A.
The dynamics of cardiac rhythm parameters during work under various loads
p0062 A82-17146

POLL, K. J.
The Link-Miles driver training simulator for tracked vehicles: Influence of cabin motion on gear-change learning
[IZF-1980-24] p0084 N82-15785

POLLOCK, M. L.
Effect of habitual exercise on left ventricular response to exercise
p0286 A82-36040

POLUSHKINA, E. F.
Radiation damage and recovery of mouse T-cells. IV - Elimination of radiation-induced migration abnormalities in T-lymphocytes
p0306 A82-38156

POLYAKOV, A. N.
Osteoporosis in unsupported extremities
p0350 N82-28970

POLYAKOV, B. I.
Reaction to diminished circulating blood volume in individuals who are susceptible and insusceptible to motion sickness (seasickness)
p0349 N82-28960

POLYAKOV, V. V.
Amino acids of femoral quadriceps of rats following flight aboard the Cosmos-936 biosatellite
p0271 N82-25766

POLYAKOVA, A. P.
Results of study of hemodynamics and phase structure of the cardiac cycle during functional test with lower body negative pressure during 140-day Salyut-6 station flight
p0126 N82-16722
Dynamics of left ventricular systolic phase structure during long-term (140-185 days) spaceflights
p0348 N82-28954

POMERANTSEV, V. P.
The ergometric determination of myocardial reserves
p0052 A82-16805

POMERANTSEVA, M. D.
The effectiveness of using various radioprotective agents for protecting the genital cells of male mice from the genetic effects of radiation. I - Investigation of the yield of dominant lethal mutations in postspermatogonial cells
p0155 A82-23289
The effectiveness of various radio-protective agents in protecting the germ cells of male mice against the genetic effects of radiation. II - The incidence of reciprocal translocations in irradiated spermatogonia
p0166 A82-25681

POMPEIANO, O.
Responses of vestibulospinal neurons to neck and macular vestibular inputs in the presence or absence of the paleocerebellum
p0067 A82-17457

PONETS, I.
Catecholamines in the blood plasma of August and Wistar rats during emotional stress
[NASA-TM-76872] p0384 N82-30885

PONEV, I.
Changes in the level of catecholamines in the noradrenaline-synthesizing structures of the rat brain following immobilization
p0202 A82-27764

PONNAMPERUMA, C.
Effect of polynucleotides on the dimerization of glycine
p0021 A82-13843
Chemical evolution and the origin of life - Bibliography supplement 1979
p0021 A82-13846
Comets and the origin of life; Proceedings of the Fifth College Park Colloquium on Chemical Evolution, University of Maryland, College Park, MD, October 29-31, 1980
p0096 A82-20853
Organic analysis of the Antarctic carbonaceous chondrites
p0098 A82-20908
Possible role of phosphine in chemical evolution
p0099 A82-20915
The role of analytical procedures in the formation of biochemicals from experiments simulating the chemical evolution of primeval earth
p0100 A82-20927
Possible selective adsorption of enantiomers by Na-montmorillonite
p0103 A82-20946
Organic geochemistry of the Isua supracrustals
p0104 A82-20961
Clay and the origin of life
p0305 A82-38115
Chemical evolution and the origin of life - Bibliography Supplement 1980
p0305 A82-38122
A protective function of the coacervates against UV light on the primitive earth
p0403 A82-45592

PONOMARENKO, I. I.
A method of evaluating the functional state of the central nervous system of a person performing work

Analysis of the effects of isoprenaline on the energy consumption of skeletal muscle
p0150 A82-23169

**ZAVORUEV, V. V.**
Cultivation of the luminescent bacterium Photobacterium leiognathi with control by luminescence
p0280 A82-35687

**ZAYTSEV, Y.**
Cooperative effort suggested for research on extraterrestrial life
p0402 N82-32284

**ZAZHIVILOV, A. G.**
Ear-nose-throat electrodiagnostic device for determining the rheobase of human mucosa and skin
p0369 A82-42629

**ZBOROVSKAYA, V. I.**
Electrode unit for testing human H reflex
p0127 N82-16728
Endurance of +Gz G forces by middle-aged people before and after 7-day immersion
p0349 N82-28958

**ZBOROVSKII, A. B.**
A study of tropomyosins in human muscular and nonmuscular organs
p0117 A82-21806

**ZEE, D. S.**
A hypothetical explanation for periodic alternating nystagmus - Instability in the optokinetic-vestibular system
p0069 A82-17474

**ZEEVI, Y. Y.**
Measurement of eye movement with a ferromagnetic contact ring
p0281 A82-35810

**ZEINALOV, A. M.**
Comparative study of the gas-transport characteristics of models of an extraerythrocytic oxygen carrier
p0262 A82-34680

**ZEKAN, C.**
Remote Medical Diagnosis System (RMDS) utilization study
[AD-A105559] p0082 N82-15771

**ZELENSHCHIKOVA, V. A.**
New data on reverse electron transport in the respiratory chains of yeast mitochondria - The induction of reverse transport by exogenous NAD-H
p0228 A82-29445

**ZELIKINA, T. I.**
Innervation of skin glands of the hedgehog /Erinaceus europaeus/ and its histochemical changes induced by hibernation
p0170 A82-25244

**ZELIKSON, B. M.**
The blood plasma protein spectrum of dogs under treatment for hypoxia with the membrane oxygenator Sever-OMR
p0152 A82-23264

**ZEMLIANSKAIA, T. A.**
Energy requirements of workers at an oil field in western Siberia
p0324 A82-40481

**ZEMTSOVSKII, E. V.**
Investigation and evaluation of cardiac arrhythmias in healthy young persons
p0110 A82-21710
Recent developments in assessing the myocardial dystrophy encountered in athletes as a consequence of chronic physical overexertion
p0280 A82-35680

**ZEVELEVA, Z. A.**
Clinical-physiological characterization of the auditory-analyzer function of workers of various occupations at the Mikhailovskii concentration mill
p0160 A82-24503

**ZGODA, N. V.**
Rate of change of physiological functions as an index of the degree of adaptation
p0283 A82-35840

**ZHABOTINSKII, A. M.**
A mathematical model of cell populations with stem cells
p0109 A82-21702

**ZHADINA, S. D.**
The effect of the electrical stimulation of afferent pathways on neurons in septal slices
p0323 A82-40469

**ZHEGNEVSKAIA, V. V.**
ATPase activity and the potassium ion permeability of erythrocyte membranes in the presence of serotonin and radiation
p0324 A82-40479

**ZHENEVSKAIA, R. P.**
Regeneration of skeletal muscle after mechanical trauma in reptiles
p0203 A82-27767

**ZHEREBCHENKO, P. G.**
The effectiveness of using various radioprotective agents for protecting the genital cells of male mice from the genetic effects of radiation. I - Investigation of the yield of dominant lethal mutations in postspermatogonial cells
p0155 A82-23289
The effectiveness of various radio-protective agents in protecting the germ cells of male mice against the genetic effects of radiation. II - The incidence of reciprocal translocations in irradiated spermatogonia
p0186 A82-25681

**ZHIDKOV, V. D.**
Morbidity involving a temporary loss of work capacity among drivers of automotive passenger vehicles
p0161 A82-24522

**ZHIKHAREVA, A. I.**
Circadian rhythm of changes of phospholipid content and the activity of nonspecific phosphomonoesterases in the rat liver
p0155 A82-23300

**ZHIRMUNSKAIA, E. A.**
Electroencephalographic correlates of the hemispheric functional asymmetry in the human brain
p0106 A82-21454

**ZHITSA, V. T.**
Microcirculatory state in the case of chronic obliteration of arteries
p0369 A82-42626

**ZHIVOTOVSKII, B. D.**
The molecular mechanisms of the interphase death of lymphoid cells. V - Determination of the lifespan of nuclear and polysomal RNA in irradiated thymocytes
p0412 A82-46867

**ZHIZNEVSKAYA, O. V.**
Functional state of rat gastrointestinal tract organs following flight in Cosmos-1129 biosatellite
p0271 N82-25765

**ZHOGOLEVA, I. B.**
Methodological aspects of studying the immune system in athletes
p0158 A82-24481

**ZHOKHOV, V. P.**
Industrial hygiene and the prophylaxis of occupational diseases in work with lasers
p0258 A82-33394

**ZHOVINSKII, V. N.**
Experimental study of the characteristics of the detection of objects on a TV display by an operator under conditions of time deficit
p0051 A82-16714

**ZHU, A.**
Studies on the property and transplantation of haemopoietic stem cells from peripheral blood
p0261 A82-34247

**ZHU, R.**
Studies on the property and transplantation of haemopoietic stem cells from peripheral blood
p0261 A82-34247

**ZHUKAUSKAS, A. B.**
A method for the objective evaluation of vestibulo-cardiac reflexes
p0419 A82-47575

**ZHUKOV, B. N.**
Changes in transcapillary metabolism in patients

with chronic venous insufficiency of legs under influence of static magnetic fields
p0387 N82-30907

ZHUKOVSKII, L. I.
Physiological criteria and methods for increasing the effectiveness of correction of hypoxic states
p0205 A82-27797

ZHUPAKHIN, K. S.
Meteorological radars as a source of microwave electromagnetic field energy and questions of environmental health
p0206 A82-27802

Meteorological radar as source of SHF electromagnetic field energy and problems of environmental hygiene
p0388 N82-30911

ZHURAVLEV, B. V.
Microelectronic electrode probe for testing brain electrical activity
p0352 N82-28982

ZHURAVLEVA, E. L.
Changes in the microelement content of muscles under denervation
p0312 A82-38598

ZHURAVLEVA, K. I.
Characteristics of the functional state of health
p0161 A82-24520

ZHURAVLEVA, N. G.
The effect of the motor activity regime on the development, conservation, and regeneration of defensive conditioned reflexes in rats
p0092 A82-20305

ZHURKOV, V. S.
The effect of long-wave ultraviolet radiation on cyclophosphamide-induced levels of chromosome aberrations in the bone marrow cells of mice
p0310 A82-38556

ZHUYKO, V. I.
Age related distinctions of cosmonauts regional hemodynamics
p0132 N82-17829

Regional hemodynamic changes after spaceflights lasting up to eight days
p0394 N82-31895

ZHVIRBLIS, V. E.
The cause of zero drift in a visual polarimeter
p0420 A82-48212

ZIABKINA, A. G.
The content of cAMP and cGMP in brain tissues during adaptation to ischemia
p0320 A82-40310

ZIANGIROVA, G. G.
The significance of the changes in the chorioretinal structures for the mechanism of the therapeutic action of the argon laser /experimental study/
p0410 A82-46712

ZIEDMAN, K.
Manual control analysis of drug effects on driving performance
p0046 N82-13709

ZIGLIO, P. G.
Determination of the anaerobic threshold by a noninvasive field test in runners
p0229 A82-29558

ZILLIG, W.
Taxonomic relations between archaebacteria including 6 novel genera examined by cross hybridization of DNAs and 16S rRNAs
p0257 A82-33276

ZILOV, V. G.
Plastic properties of motivation as prime component in systemic organization of purposeful behavioral acts
p0391 N82-30937

ZILSTORFF, K.
Vestibular effects of water immersion and Clonidine
p0337 A82-40762

Measurements of vestibular function
p0180 N82-19826

ZIMAKOVA, I. E.
Correlation of the stress protective and autonomotropic effects of mebicar
p0164 A82-24559

The protective effect of psychotropic drugs diazepam, sodium hydroxybutyrate, and mebicar during experimental arrhythmia
p0413 A82-46885

ZIMAKOVA, I. Y.
Effect of mebicar on animals under extreme conditions
[NASA-TM-76851] p0383 N82-30879

ZIMKIN, N. V.
The role of the extrapolation and dynamic stereotype in the mechanism of the formation and improvement of adequate motor coordination
p0374 A82-43651

ZIMMERMAN, T.
Evaluation of short-term bioassays to predict functional impairment. development of pulmonary bioassays in small animals: Directory of Institutions; individuals involved in utilization
[AD-A103767] p0075 N82-14798

ZINCHENKO, V. P.
The mechanism of the action of low intensity ultrasound on mitochondria
p0420 A82-48207

ZINGER, F. KH.
Thermoregulation and morbidity in coal miners
p0191 A82-25815

ZINGERMAN, A. M.
The typological systematization of adaptive responses - Example of the antiorthostatic effect
p0165 A82-24835

The voluntary regulation of heart rate
p0236 A82-31161

ZINGERMAN, L. S.
Computer analysis of tests involving physical stress
p0190 A82-25807

ZINKOVSKII, A. V.
The elasticity of the foot during the modelling of human movement
p0420 A82-48211

ZINKOVSKII, A. V.
Simulation of some of man's movements in different gravity fields
p0124 N82-16712

ZINOVEV, IU. V.
Elevation of hypoxia tolerance under the influence of prolonged fasting
p0186 A82-25679

ZINOVIEVA, L. A.
Slow waves of cardiac rhythm in healthy man under different conditions
p0348 N82-28955

ZITZEWITZ, P. W.
Beta decay and the origins of biological chirality - Experimental results
p0290 A82-37420

ZLATKIS, A.
Analysis of volatile metabolites in biological fluids as indicators of prodromal disease condition
[NASA-CR-167513] p0175 N82-18859

ZOLOTAIA, R. D.
An analysis of the role of genetic and environmental factors in predicting the effectiveness of arterial hypertension treatments
p0410 A82-46719

A system of methodological approaches to the evaluation and prognostication of the hemodynamic effects of hypotensive and antianginal compounds
p0413 A82-46889

ZOLOTAREV, F. IA.
The nature of induced EEG activity in the alpha-rhythm range
p0028 A82-15713

ZOLOTAREVA, G. A.
Reactive changes in autonomic synapses upon frequency electrostimulation
p0152 A82-23263

ZOLOTAREVA, IU. B.
Influence of 15-day alimentary starvation on human tolerance to the breathing of pure nitrogen
p0027 A82-15710

ZORBAS, Y. G.
The reliability of flight personnel during the operation of the Mi-4 helicopter
p0087 A82-19014

Effects of lower body negative pressure on the reliability of cardiovascular system using X-ray kymograms
p0334 A82-40728

ZOTOV, V. A.
Disturbances in biological rhythms as a result of a conflict of incompatible stimuli

p0111 A82-21720
ZOZULIA, I. S.
State of adaptation in patients with hypertension
p0324 A82-40476
ZUBKOV, B. V.
Quantitative evaluation of hoarseness using a computer
p0242 A82-31540
ZUBKOVA, S. M.
Immunodepressive and immunostimulatory effects of decimetric waves on the primary immunological response
p0239 A82-31511
ZUEVA, N. A.
Reactions of O-18 exchange in the myosin systems of skeletal, cardiac, and smooth muscles
p0313 A82-38614
ZUMWALDE, R. D.
Carbon/graphite fibers: Environmental exposures and potential health implications
[PB81-229692]
p0014 N82-11780
ZURABISHVILI, G. G.
A study of the mechanism governing the different types of behavior exhibited by the spiral excitation wave period in auricle and ventricle
p0312 A82-38597
ZUZEWICZ, W.
Central nervous system reactivity in the image of the visual evoked potential and the perceptual-motor performance of pilots and cosmonaut candidates under conditions of sleep deprivation
p0251 A82-31831
ZVALINSKII, V. I.
Light curves for photosynthesis under intermittent illumination
p0313 A82-38608
ZVEREVA, G. S.
A basis for the optimal duration of work breaks in the presence of noise of various intensities during the course of a work shift
p0160 A82-24510
A physiological justification of allowable noise levels in work involving heavy physical labor under nervous stress
p0368 A82-42617
ZVIAGILSKAIA, R. A.
New data on reverse electron transport in the respiratory chains of yeast mitochondria - The induction of reverse transport by exogenous NAD-H
p0228 A82-29445
ZVORYKIN, V. P.
Neuromorphological evidence of individual differences in human vision
p0159 A82-24500
ZWICK, H.
Low-level laser light effects - Long-term effects
p0140 A82-22913
Changes in spectral acuity following laser irradiation
p0140 A82-22914
Long-term and progressive changes in Rhesus spectral sensitivity after low-level coherent light (514nm exposure)
[AD-A111639]
p0347 N82-28946
Comparison of rhesus and human spectral dynamic visual acuity
[AD-A115258]
p0433 N82-34018
ZYBIN, O. K.
Jugular, right atrial pressure and cerebral hemodynamics of healthy man submitted to postural tests
p0131 N82-17825
ZYBIN, O. KH.
Effects of novodrine and physical exercise on hemodynamics and coronary blood supply in the healthy human
p0236 A82-31157
ZYBKOVETS, L. IA.
Comparative study of several physiological parameters in the evaluation of functional condition in nurses
p0119 A82-21826
ZYKOV, N.
Conductors of the airways
p0207 A82-27812
ZYKOVA, I. A.
Indicators of the T system of immunity during physical overstraining
p0154 A82-23281

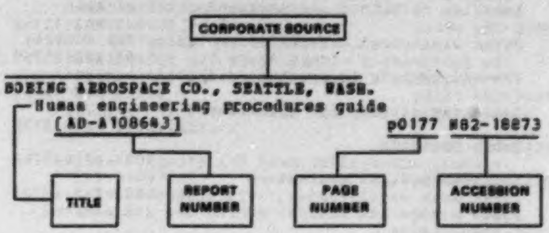
# CORPORATE SOURCE INDEX

**AEROSPACE MEDICINE AND BIOLOGY** / *a continuing bibliography* JANUARY 1983

1982 Cumulative Index

## Typical Corporate Source Index Listing



Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title. Under any corporate source the accession numbers are arranged in sequence with the *IAA* accession numbers appearing first.

A

ACCORD, LOS ALTOS, CALIF.
Application of Guided Inquiry System Technique (GIST) to Controlled Ecological Life Support Systems (CELSS)
[NASA-CR-166312] p0247 N82-22886
ADMIRALTY MARINE TECHNOLOGY ESTABLISHMENT, TEDDINGTON (ENGLAND).
Personalised task representation: Developments
[AMTE(E)-TM-81104] p0247 N82-22885
APU Man-Computer Studies Group Seminar Proceedings 1
[AMTE(E)-TM-80109] p0274 N82-25790
Three computer roles in a cybernetic learning system
p0274 N82-25791
The representation of knowledge: Goldstein's genetic graph
p0274 N82-25792
The representation of knowledge: Pask's L sub p
p0274 N82-25793
ADVISORY GROUP FOR AEROSPACE RESEARCH AND DEVELOPMENT, NEUILLY-SUR-SEINE (FRANCE).
Physiopathology and pathology of spinal ailments in aerospace medicine
[AGARD-AG-250-FR] p0011 N82-10720
Sleep and wakefulness handbook for flight medical officers
[AGARD-AG-270(E)] p0300 N82-27972
Physiopathology and pathology of spinal injuries in aerospace medicine
[AGARD-AG-250(ENG)] p0359 N82-29870
Anatomy of the spine
p0359 N82-29871
Biomechanics of the spine
p0359 N82-29872
Spinal stresses in flight
p0359 N82-29873
Theories of the pathogenesis of fractures of the spine
p0359 N82-29874
Aetiology and pathogenesis
p0359 N82-29875
Helicopter accidents
p0359 N82-29876
Ejection of pilots from combat aircraft
p0359 N82-29877
Parachuting
p0359 N82-29878
Limits of human tolerance for impacts in free fall
p0360 N82-29879
Fractures of the spine in flight
p0360 N82-29880
Accidents in centrifuges and experiments (ejection seat training towers, sleds)
p0360 N82-29881
Clinical examination of spinal injuries
p0360 N82-29882
Radiology of spinal trauma in aviation medicine
p0360 N82-29883
Analytical study of traumatic lesions of C3-C7
p0360 N82-29884
Radiological study of fractures of C1 and C2
p0360 N82-29885
Sequelae of vertebral fractures and trauma
p0360 N82-29886
Backache in helicopter pilots
p0360 N82-29887
The cervical column of pilots of combat aircraft
p0361 N82-29888
The spine and fitness for flight
p0361 N82-29889
Vertebral arthritis
p0361 N82-29890
Ankylosing spondylitis
p0361 N82-29891
Medico-legal aspect of spinal disorders in aviation medicine
p0361 N82-29892
Noninvasive techniques for cardiovascular examination of interest in aerospace medicine
[AGARD-AG-277(FR)] p0398 N82-31930
AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).
A review of aircraft cabin conditioning for operations in Australia
[AD-A109044] p0219 N82-20880
AERONAUTICAL SYSTEMS DIV., WRIGHT-PATTERSON AFB, OHIO.
Investigation of spatial disorientation of F-15 Eagle pilots
[AD-A104684] p0014 N82-11781
AEROSPACE MEDICAL DIV. AEROSPACE MEDICAL RESEARCH LABS. (6570TH), WRIGHT-PATTERSON AFB, OHIO.
A comparison of head and manual control for a position-control pursuit tracking task
p0047 N82-13720
AEROSPACE MEDICAL RESEARCH LABS., WRIGHT-PATTERSON AFB, OHIO.
A study on task difficulty and acceleration stress
p0040 N82-13668
Preliminary study of the effects of prolonged acceleration on spinal dynamics of baboons. 1: Acceleration. 2: Biomechanical analysis
[AD-A101766] p0245 N82-22871
Aerodynamic forces experienced during ejection
[AFAMRL-TR-80-16] p0246 N82-22878
Effects of whole and partial body exposure to dry heat on certain performance measures
[AD-A100305] p0246 N82-22880
Torso experienced aerodynamic forces experienced during ejection
[AD-A098942] p0267 N82-24823
A performance analysis study of a complex G field experiment
p0380 N82-30852
Variations in noise dosimeter readings of fluctuating noise
[AD-A115763] p0431 N82-34002
A performance analysis study of a complex G field experiment
p0439 N82-34056
AIR FORCE ACADEMY, COLO.
An analysis of aircrew procedural compliance
p0506 A82-46263
AIR FORCE AERO PROPULSION LAB., WRIGHT-PATTERSON AFB, OHIO.

Toxicology of high energy fuels
[AD-A111686] p0294 N82-26966

**AIR FORCE FLIGHT TEST CENTER, EDWARDS AFB, CALIF.**
Quantification of pilot workload via instrument scan
[NASA-CR-169238] p0362 N82-29900

**AIR FORCE HOSPITAL, WIESBADEN (WEST GERMANY).**
An industrial hygiene evaluation of aircraft refueling inside closed aircraft shelters at elevated ambient temperatures
[AD-A114396] p0353 N82-28994

**AIR FORCE HUMAN RESOURCES LAB., BROOKS AFB, TEX.**
Weighting of aptitude components based on differences in technical school difficulty
[AD-A102045] p0048 N82-13725
Aptitude requirements based on task difficulty: Methodology for evaluation
[AD-A110568] p0297 N82-26983
Advanced Instructional System: Applications for the future
[AD-A117184] p0425 N82-32980

**AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OHIO.**
Predicting pilot opinion ratings of flying qualities of highly control augmented aircraft using an optimal pilot model
[AD-A111136] p0268 N82-24837
Finite element analysis of the visco-elastic interaction of the annulus fibrosis and nucleus pulposis within the human intervertegral joint
[AD-A111161] p0300 N82-27971
Aircrew ionizing doses from radioactive dust cloud generated by nuclear burst
[AD-A115541] p0390 N82-30929
A cortically implantable multielectrode array for investigating the mammalian visual system
[AD-A115484] p0390 N82-30931
Prediction of short term tracking tasks using an optimal pilot model
[AD-A115543] p0392 N82-30940
Effects of higher order control systems on aircraft approach and landing longitudinal handling qualities
p0438 N82-34052

**AIR FORCE SYSTEMS COMMAND, BROOKS AFB, TEX.**
Programs in education and training of manpower and personnel, including logistics and group aspects of human factors engineering
[AD-A116275] p0427 N82-32990

**AIR FORCE SYSTEMS COMMAND, WRIGHT-PATTERSON AFB, OHIO.**
Fundamentals of aeronautical and aerospace medical science
[AD-A102298] p0079 N82-15736
The developmental history of aeronautical and aerospace medical science
p0079 N82-15737
Environmental conditions of aviation and space navigation
p0079 N82-15738
General laws of aviation and space navigation environmental effects on the human body
p0079 N82-15739
Medical problems of gravitational changes and powered flight

1. Report No.
NASA SP-7011(241)

2. Government Accession No.

3. Recipient's Catalog No.

4. Title and Subtitle
AEROSPACE MEDICINE AND BIOLOGY
A Cumulative Index to the 1982 Issues

5. Report Date
January 1983

6. Performing Organization Code

7. Author(s)

8. Performing Organization Report No.

9. Performing Organization Name and Address
National Aeronautics and Space Administration
Washington, D.C. 20546

10. Work Unit No.

11. Contract or Grant No.

12. Sponsoring Agency Name and Address

13. Type of Report and Period Covered

14. Sponsoring Agency Code

15. Supplementary Notes

16. Abstract

This publication is a cumulative index to the abstracts contained in the Supplements 229 through 240 of *Aerospace Medicine and Biology: A Continuing Bibliography*. It includes three indexes--subject, personal author, and corporate source.

17. Key Words (Suggested by Author(s))
Aerospace Medicine
Bibliographies
Biological Effects

18. Distribution Statement
Unclassified - Unlimited

19. Security Classif. (of this report)
Unclassified

20. Security Classif. (of this page)
Unclassified

21. No. of Pages
634

22. Price*
$12.00 HC

*For sale by the National Technical Information Service, Springfield, Virginia 22161

# PUBLIC COLLECTIONS OF NASA DOCUMENTS

## DOMESTIC

NASA distributes its technical documents and bibliographic tools to eleven special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

**CALIFORNIA**
University of California, Berkeley
**COLORADO**
University of Colorado, Boulder
**DISTRICT OF COLUMBIA**
Library of Congress
**GEORGIA**
Georgia Institute of Technology, Atlanta
**ILLINOIS**
The John Crerar Library, Chicago
**MASSACHUSETTS**
Massachusetts Institute of Technology, Cambridge
**MISSOURI**
Linda Hall Library, Kansas City
**NEW YORK**
Columbia University, New York
**OKLAHOMA**
University of Oklahoma, Bizzell Library
**PENNSYLVANIA**
Carnegie Library of Pittsburgh
**WASHINGTON**
University of Washington, Seattle

NASA publications (those indicated by an '*' following the accession number) are also received by the following public and free libraries:

**CALIFORNIA**
Los Angeles Public Library
San Diego Public Library
**COLORADO**
Denver Public Library
**CONNECTICUT**
Hartford Public Library
**MARYLAND**
Enoch Pratt Free Library, Baltimore
**MASSACHUSETTS**
Boston Public Library
**MICHIGAN**
Detroit Public Library
**MINNESOTA**
Minneapolis Public Library and Information Center
**NEW JERSEY**
Trenton Public Library
**NEW YORK**
Brooklyn Public Library
Buffalo and Erie County Public Library
Rochester Public Library
New York Public Library
**OHIO**
Akron Public Library
Cincinnati and Hamilton County Public Library
Cleveland Public Library
Dayton Public Library
Toledo and Lucas County Public Library
**TEXAS**
Dallas Public Library
Fort Worth Public Library
**WASHINGTON**
Seattle Public Library
**WISCONSIN**
Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, New York 10019.

## EUROPEAN

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. By virtue of arrangements other than with NASA, the British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy of microfiche of NASA and NASA-sponsored documents, those identified by both the symbols '#' and '*', from: ESA - Information Retrieval Service, European Space Agency, 8-10 rue Mario-Nikis, 75738 Paris CEDEX 15, France.
